Just be aware your comments about clean air and health impacts, and everyone deserves right for living a healthy life free from air contaminants is going to set precedence when all the outdoor cannabis cultivation starts and people complain about odors impacting their health.

Thank you Chair Lawson-Reemer, thank you to the county supervisors.

My name is Alberto Estrada as a resident in the Otay Mesa West area since late 1988 and president of the Mercedes Hills HOA, a community of 126 homes, I come before you to ask that you support supervisor Paloma Aguirre's request to release funds required to address the Tijuana River tragedy, it is a tragedy that only those that are affected by it on a day to day basis can really understand. We need the so-called "Hot Spot" at the end of Saturn Boulevard and expanded tracking of dangerous hydrogen sulfide issues addressed as soon as possible. Most if not all of you have visited this ecological disaster, would you subject your own family to this social injustice? I do not believe so.

Please support supervisor Aguirre's request, Thank you

I strongly support unlocking funds to expand the AIRE program for residents affected by the Tijuana River pollution crisis. The program already helps people sleep better, breathe easier, and experience fewer headaches and other health problems from sewage odors. The Boys & Girls Clubs of South County has seen children and families directly impacted. On some days, the air is so bad we have to close the Club, keeping kids from a safe place to learn and play. More air purifiers in homes will give families immediate relief while long-term fixes are

underway. South Bay residents deserve clean air and protection now. Please act to expand this program.

The AIRE program has proven effective in providing interim relief from the odors and respiratory symptoms caused by the Tijuana River sewage crisis. However, additional air purifiers are urgently needed to better protect the public from the unhealthy air we are exposed to every day. We cannot allow more people to suffer while waiting for a "100%" solution. Expanding the air purifier program will help South Bay residents breathe easier now, while long-term solutions are pursued.

I support continued funding of this program, and increasing the number of air purifiers per household to align with CDPH recommendations. Residents of Otay Mesa West, San Ysidro, Egger Highlands, Nestor, and Imperial Beach deserve relief from indoor air pollution caused by the sewage crisis. As the San Diego Air Pollution Control District survey data demonstrates, the program has already resulted in "better sleep, less eye irritation, fewer headaches, improved breathing, less coughing and throat irritation, fewer allergies and asthma symptoms...[and] reduced sewage-related odors" for residents. I hope anyone reading this disregards the other person's racist comment below. That's not the kind of behavior I'd like our community to uphold or tolerate.

Good if you don't go outdoors. Maybe you should distribute gas masks.

No lottery this time please. Please give these to the people who really need them. Maybe you can even spare a few for the Javiers.

It sounds like these special families will get to change the filters and clean out purifiers as well as their daily work. Why not just fix stuff yourselves, instead of waiting for the Feds?

But there's got to be a better way than indoor fixes so that these sick and sensitive people can enjoy the outdoors in this great County famous for its outdoor activities.
