Oppose

How much money can we continue to spend on programs when individuals are not required to accept said services? Tie stipulations to distributions of funds.

Let us know why this is on the consent calendar and not up for discussion. It is not a routine item.

It is disgraceful to throw people with serious mental issues in permanent supportive housing and essentially not support them as individuals. I think that this is a good opportunity to rehabilitate these people and hopefully reconnect them with normal society.

A pilot program of this sort should be up for public discussion just in case someone mentions something that will enhance the program
