Is this single source or competitive? The Board letter says it is “single source competitive procurement” and then lists 4 manufacturers. So which is it?

Why are you going single source on a common item like standard radio equipment? Sole source contracts lock out a lot of other firms who might have more up-to-date products which might work better in a changing communications environment. This also has the potential to lock in higher prices or even, occasionally, fraud.

So it's worth the extra effort to go competitive.
