I left with the Clerk hard copy on this because I couldn't stay for the afternoon session. Briefly, an essential area of data integration is calls to 911 assessed for referral to LE, MCRT, or PERT. Get 911 data on all possible MCRT calls. Data on the use of the six screening criteria for MCRT will be essential to see how the criteria are used to make decisions to refer or not to MCRT. Link these data systems with BH data to properly track vulnerable people from an initial contact by LE. Thanks.

I hope the report on Potential Opportunities and Challenges Impacting Data Sharing will present the results in a balanced and impartial way.
