We should have the agreement in an attachment.

The Board says the agreement needs to be approved by June 30. You have several meetings where you could amend the terms.

For one thing, no-one should be living or cooking in the hangars, as Robert Germann has pointed out. It is a huge fire hazard in an area with toxic and flammable gases around (whether residual, in the walls, floors, or active fumes.)

And the use of lead in aviation fuel should be banned. It is not in general use, and there are less hazardous ways to pump up an airplane's performance without spraying the neighbors and kids with lead.

So these should be included in the amendment. Please reject this defective JPA renewal.
