"a simple analysis of our current enrollment in CS reveals that over 45,000 of our most vulnerable residents are going without services that would help them improve their health and quality of life." Being able to identify barriers of access has the opportunity to impact lives in communities that are the most vulnerable. I support an analysis of factors that affect Medi-Cal Transformation implementation and establishing a dedicated taskforce.

The Board Letter says "The County has several analyses currently underway evaluating the Medi-Cal Transformation Landscape as part of the Medicaid Taskforce as well as through contracted efforts undertaken by Partners in Care Foundation, Inc." This adds another analysis, potentially overworking staff and kicking the can down the road for another 90 days.

My suggestion would be to combine data from the previous analyses and see if we really need another one before proceeding.
