It is shameful that our electricity is provided by a for-profit monopoly! Get rid of SDG&E and do the job better for your constituents. SDG&E is ripping us off and ruining California's climate goals.

Having a helicopter capable of flying at night will help keep wildfires from expanding on hot nights.

Shame on SDG&E for purchasing but not deploying a firefighting helicopter. Wonder how much property damage occurred through its non-use, and wonder how much extra we paid on our bills. But I am glad that SDG&E is willing to provide funding to support this copter.

And it would be nice if the money could come out of the reserves instead if somewhat less secure (especially these days) bond funding.
