We need to invest in masks with sensors being developed in Shanghai that detect flu and COVID in the air, and create a network with an information center to respond to outbreaks in real time. It will be like continuous pool testing at key locations and should be in classrooms, large nightclub/restaurants, megachurches and other indoor

events. The early notification could be a game changer as eliminating some superspreading events will help to contain and maintain containment of this virus.

Tim McClain Public Information Officer for HHSA said: Are those who are hospitalized for other reasons, but who incidentally test positive for Covid, still considered to be "Covid" hospitalizations? "Yes. Hospitals are not currently required by state regulation to provide clinical information on cases." Can you please require the hospitals to report deaths WITH Covid separately from deaths FROM Covid so we get accurate data? And go back and recalculate the data so we get accurate death counts?

Stop the nonsense. There are no Covid/Monkeypox emergencies. No more funding.

Please rescind the State of Emergency for Covid. On pg 3 of today's Board of Supervisor's letter for this item, it says.

The emergency responses allow for:

- _ other political subdivisions to provide mutual aid....
- _ state agencies to provide mutual aid including personnel,

I'm not aware our County currently needs any mutual aid from other political subdivisions or need extra personnel for Covid Response. The Aug '22 County Unified Disaster Council had MPox & Fentanyl updates, but none for Covid

Bifurcate & vote NO on continued teleconferencing. The public can already do so under your revised Rule 4c, & Supervisors can under original Govt. Code Section 54953. SANDAG quietly let teleconferencing under AB 361 go gently into the good night; so should the SD County Board of Supervisors.

Also, the public needs to be aware that the relaxed rules make life easier for politicians, so it's not about public safety, but THEIR privacy & convenience. Quit gaslighting people; follow SANDAG's lead.

Government Code Section 8655 defines an emergency, including "the duly proclaimed existence of conditions of disaster or of extreme peril to the safety of persons and property....

What are the exact current conditions of disaster and extreme peril existing in the county regarding Covid-19?

Please answer this clearly and directly.

Please answer this clearly and directly.

I oppose any continued use of government resources being spent on anything COVID-19 related. According to Google at the time of this writing, there have been 621 million COVID-19 infections worldwide. This means a person has a 1% chance of dying from a COVID-19 infection. This equation does not take into consideration any pre-existing health or living conditions. The average person has an almost 0% chance of dying from COVID-19. The only emergency is the erosion of our constitutional rights.
