Anyone vaccinated, you better get detoxed bcuz you're going to have a gruesome painful death by exploding in your gut and all your organs turning gangrene. Thats what we are seeing on this frontline in healthcare.

Im writing to express concern regarding the county's movable tiny home ordinance, which has remained in draft form and was originally expected to be completed 2 years ago. As housing costs continue to rise, the need for accessible, affordable housing options has become more pressing than ever. Tiny homes on wheels offer a sustainable, cost-effective solution that can help alleviate housing insecurity and expand living options for residents who are priced out, including seniors, young adults, working families, and veterans. This prolonged delay has left many residents uncertain whether they can move forward with responsible plans to build or place tiny homes legally. At a time when creative housing solutions are urgently needed, we urge the County to prioritize the completion and implementation of this ordinance. We respectfully request the current status of the ordinance. Thank you for your attention to this matter & we look forward to your leadership on this critical housing issue.

Such chaos last week. All supervisors should have been at the TRV with EPA Sec Lee Zeldin. The supervisors must work together to solve this issue. [Also all supervisors should have attended the state of the county address.] The public has every right to be alerted to the county's actions using taxpayer dollars for the so-called best interest and safety of every resident. This currently is not happening. Especially over the past 5 years when this board's actions have been detrimental to American citizens and legal residents as other interests, agendas, ideology and people are prioritized, ie, convicted violent criminal illegal foreigners. Chaos continues. The board has strayed from the county motto: The noblest motive is the public good. Instead the motto is now "For Terra & Monica", straying from the core function of this board.

The disregard of the public in attendance is abhorrent. But some on this board aim to shut down free speech and the right to redress the government.

Hi, I'm writing to thank you for taking action to bring back the health of our California coastlines, preventing future mass ocean animal death events. You saw that hundreds of marine animals were washing ashore in distress or dying. When the beaches from San Diego to Los Angeles experienced unprecedented levels of domoic acid poisoning, compounded by a toxic cascade of runoff carrying heavy metals, ash, and chemical residue from recent fires, including those in the Palisades.

THANK YOU for:

Declaring a regional environmental emergency and coordinating agencies

Funding urgent toxicology research in LA & Imperial Beach

Enforcing stronger pollution regulation

Supporting community marine rescue & cleanup

Fully funding the Tijuana Wastewater Treatment plan

Elevating public awareness

Blocking runoff from wildfire sites

Thank you for protecting marine wildlife and restoring our California beaches.

Key facts:

250+ stranded marine animals. 70+ dolphins, 47 sea lions, a minke whale - all dead

Last meeting, there were 21 items. Four of them were deferred to Wednesday. In the future, I suggest that if there are more than 17 items, please consider deferring some of the items before the final agenda, so that people can plan their time to be here or speak online better. Reminder: most people work, shop, or have kids, not everyone can be here or even speak online at the drop of a hat.
