This ordinance is too vague on the type of plants that are considered combustible.

The proposed ordinance SEC. 68.402. defines "DEFENSIBLE SPACE" as an area where Combustible Materials have been treated, cleared or modified to slow the rate and intensity of an advancing wildfire and to create an area for fire suppression operations to occur. So if treated or modified, how does this help create an area for fire suppression? Also says Combustible Vegetation does not include vegetation that is well pruned and maintained - well pruned? sounds arguable, a loophole. Fix the logic!
