Subject: [External] SUPPORTING SAN DIEGO'S BIOMEDICAL SECTOR (PLEASE INCLUDE WITH DOCUMENTS FOR AGENDA #20)
Date: Thursday, May 29, 2025 10:17:08 AM

Good Morning, Supervisors,

UCSD is usually responsible and deserves our support. But there are lots of institutions and companies which do not deserve our support.

However, many of us disapprove of big companies like Pfizer Pfizer, who foisted vaccines on us and insisted they were safe despite the odds and not testing them adequately. Moreover, you should be objective in examining the cause of death in COVID patients. Did they really die from COVID or from its side-effects.

The CDC and FDA won't tell and don't want us to find out. Which is why only 42% trust them, about the same for 3 years.

Also, many of us disapprove of psychotropic drugs, a quick fix with bad results. The side-effects are harmful. Especially for kids, where a minor overdose can have major medical and legal consequences. In fact, look at Polinsky and all the legal and societal problems it has caused, and please shut it down.

All drugs and vaccines like these have side effects but the way they are prescribed these days advocates a one-size-fits-all policy that does not take individual differences into account. I also hear that you have unqualified people giving medical advice or even administering these.

On the other hand, some beneficial and natural cures have been used since the days of the Flintstones – WilmAAAA! Remember Ms. Wooten who declared a COVID state of emergency on Feb. 14, 2020, with no COVID deaths in the County?
