Option A creates real opportunity by aligning with workable standards, allowing responsible operators to create jobs, generate tax revenue, and support services that families rely on—including disability services, youth programs, and community-based supports. These are the same communities that have carried the burden of past policies without receiving the benefits.

If the goal is truly to repair harm and move forward, Option A is the only option that makes expansion real. Anything else continues exclusion under a different name.

For equity, accountability, and community healing, Option A is the only choice

I'm glad that you want to fix up 62 drainage culverts in the unincorporated areas. Hopefully, there will be less flooding as a result. However, a 15% contingency fee is ridiculous. Please explain this. Again, until this is fully explained to the people, I recommend a no vote.

We need to get a handle on these high contingency fees.
