BOARD POLICIES APPLICABLE:
A-87, Competitive Procurement

BOARD POLICY STATEMENTS:
Board Policy A-87, Competitive Procurement - Authorize single source procurement for Verisk Analytics Inc.'s Anti-Fraud One - Government (AF1 - Gov) software license.

Item and Service and Term Period: Services include access to the ClaimSearch proprietary database containing claims information from 97% of all property and casualty carriers and third-party administrators throughout the United States. AF1 - Gov will facilitate the ability to conduct suspect inquiries to quickly detect fraud networks on a scale well-beyond the DAO's current capacity. The proposed term is for up to three years, and an additional six months if needed.

Benefits to the County of San Diego: Access to comprehensive industry data and analytics would enhance the District Attorney's Office's (DAO) ability to assess and mitigate emerging fraud risks, as well as increase effectiveness and efficiency in the identification, prioritization, and investigation of fraud. In addition, reducing the instances of insurance fraud will reduce the cost for consumers and employers, contributing to overall social and economic enhancements.

Justification: A-87(1)(D)(3): This procurement is for services from a provider with unique knowledge, skills, and abilities not available from other sources. Other potential providers of the services cannot provide similar efficiencies or critical knowledge. The provider offers access to proprietary data and proven acumen as a leader in technology-based insurance fraud solutions, as well as a thorough understanding of the required data security and privacy.

AF1 - Gov software license will grant the DAO automated access to the largest claims database and insights to triage investigations - a unique combination not available from other sources. Verisk Analytics Inc. is well-positioned to use its prior extensive experience with state departments of insurance, most recently in Florida and Pennsylvania, to streamline access of data and analytics for San Diego County.

Fair and Reasonable Price: All contracts are subject to negotiation and determination of a fair and reasonable price. Fair and reasonable pricing will be determined based on comparison to similar data services.
