

GUN VIOLENCE REDUCTION PROGRAM WORK PLAN
Updated April 2025

Guiding Principles:

- Community-Led: Those who are frequently and directly exposed to gun violence must be involved, and collaborative action is needed from representatives from diverse sectors.
- Solution-Focused: Actions should result in concrete assistance to those working on these issues and affected by gun violence.
- Evidence-Informed: Using reliable data and research is critical to understanding who is most affected by gun violence and what factors and circumstances are contributing to violence or helping to create safety. Combine research, context, and experience to inform this understanding.
- Person-Centered: Understand that racial injustice has created neighborhoods of concentrated disadvantage, perpetuated poverty, and caused multigenerational harm. Actions must promote healing and minimize harm.
- Equity-Oriented: Adequate resources, including tailored interventions, should be directed to people who are experiencing inequity.

Work Plan actions include opportunities to enhance or expand upon existing efforts and explore new areas of focus or investment.

ACTION	PREVENTION STRATEGY	VIOLENCE TYPE	LEAD AGENCY	PARTNERS	PROGRESS
1. Develop suicide prevention educational content directed towards high-risk populations, to include the promotion of safe storage of firearms, behavioral treatment access, and other suicide prevention education. Collaborate with County departments and community partners to disseminate this educational content to clients/individuals, caregivers/family members, and service providers.
