I strongly support this and continued alignment with state and federal,including supporting assembly bills generated by State Senator Padilla and supporting them publicly

Well, I'm glad someone finally recognizes the importance of catching the trash, which was there some years ago. Now if only we had hand held or automobile-attached pollution monitors to zero in on the pollution. Accurate data at monitoring agencies would also help.

It would look ugly, but instead of restricting the TJ River in a sewage emergency, consider putting a plastic or concrete lining on the riverbanks to speed up the flow out to sea.

I'm not sure about SANDAG contributing toll revenue, since that would end up reducing what was promised to SD County regions which now badly need transit improvements funded by those tolls.
