This ordinance will be a destroyer of many businesses throughout the county. This will cause even more businesses to leave San Diego and California, thus lowering the number of jobs in the county, and reductions in revenue from all forms of county and state taxes. This will not help families, it will harm families, and accelerate the migration of businesses and jobs out of San Diego and California.

After listening to Supervisors Fletcher and Lawson, I am appalled at how OUT OF TOUCH they are with minorities with their fake indignation virtue signaling. Over half of my employees are minorities! I am a minority! Doesn't matter to them. Lawson had no problem tearing into another minority economist with questions of circular logic while touting herself. The fact is this will hurt a lot of minority businesses and people will flee SD as they have done with LA County. Wake up and vote people!

Terra Lawson is having a great time tearing into the study that opposes the ordinance. Why not make informed law decisions BEFORE you make law. Instead you make these uninformed law decisions then make excuses on what everyone else did wrong. You failed as a politician because you should be making informed decisions in the best interest of your constituents. You failed to inform the public, you failed to make those studies YOURSELF. POLITICS 101, you are failing.

READ the DATA, if you choose anything but option 2C, then we know UNIONS are filling these politicians campaign funds. When elected, these politicians provide a QUID PRO QUO to those UNIONS to secure govt contracts at TAXPAYERS EXPENSE. If politicians can now operate GOVT REMOTELY then lets elect NON-POLITICIANS to office. VOTE for Real People without any motives except the best interest of their constituents, not to pay for these politicians reach for POWER.

Ordinance 73.11 is bad policy. It is not the right, nor the domain of the government to institute or regulate private wages. Free markets regulate themselves so long as law and order is applied equally.

This is a very bad idea for businesses and their employees. Employees will end up losing their jobs NOT making more money. The County airports will need to rely on taxpayers to pay their expenses instead of being self funding as they are now. Please look at the big picture and not just what unions want!

As a City of San Diego resident I support the implementation of the Working Families Ordinance. Without this kind of support, we are creating a race to the bottom situation. Ensuring a prevailing wage for a skilled and trained workforce will elevate the local economy, not depress it. For projects that use public tax dollars and are built on public land, we need to do the right thing for the work force and the public and pay a living wage.

Section 1 of Attachment B (AN ORDINANCE ... ESTABLISHING A WAGE FLOOR) proposes to address inadequate pay and poor working conditions by dictating what employers should pay employees. Yes, that will raise wages for some...and eliminate the wages for the least skilled who will be laid off -- the unintended consequences of wage controls. The county should instead encourage businesses to locate that will bring better paying jobs to which workers can aspire making room for less skilled to move up.

This will Kill the businesses and industries in and around the airport, or on any county leased property. Anyone who thinks this is a good idea does not have a good idea of what's really going on at the County Properties. WE must not allow this to continue, businesses will leave and setup shops outside of the County. It is evident that this is not a good plan.

As a small business owner at Gillespie field, the Working Families Ordinance would have a detrimental impact on my business. We value our employees and pay them a fair wage plus benefits. We offer performance bonuses and regular increases that can be planned and budgeted for. The Working Families Ordinance would take the ability to plan and scale our pay and leave us with no choice but to immediately lay off a major percentage of our

workforce. We would also immediately terminate our lease.

Another overreach of government without thought of the actual cost to small businesses. If you all keep forcing wages on small business, then you will destroy the small business community. Supposedly all Politicians support small business as the backbone of the country, yet they continue to legislate how the business is run and how the pay employees. Free Enterprise works as long as government overreach and regulations do not destroy it. This is a bad deal for any small business

Small businesses are the economy, you cannot force these small businesses to make up for the failure of government to properly educate its citizens. Dont force small businesses to pay the outrageous wages these unions pay, remember, these unions negotiate contracts with the government. These unions pour money into politician's campaign coffers. These politicians in turn, try to grow these unions, the larger the union, the larger the donations to his/her/them/they/binary/xe/xem campaigns.

These type of proposals can cause harm to businesses, their employees and customers. We all must be competitive in required skills, jobs and pay. Government should not state what should be acceptable in business' as they have little to no expertise in the wide variety of businesses and have no responsibility for the success of the business. Is government now going to guarantee a certain level of profitable revenue for each company? Who would pay for this?

Vote NO (2C) on this WFO. If this passes, it will force my Helicopter School (Civic Helicopters) to close its doors after decades of operation in San Diego County. This will force students like myself to travel out-of-state to get comparable training at a similar facility. This not only is a physical and financial hardship but will also damage the aviation industry as the owner, Chin Tu, is the reason so many pilots are alive today because of his teachings. This IS NOT the answer for fair wages.

I am a flight instructor at a small flight school, Civic Helicopters. Instituting legislation that is peanut-butter spread across all businesses will hurt the small businesses the most, which are likely already paying fair wages to their employees. I agree with other comments that state/federal laws should be the avenue for fair pay and labor laws, not a county mandate where frankly some of the supporters would love to see the airports lose business so they don't have to hear airport traffic.

Workers in skilled trades that are not in union shops and have no desire to be in one will be hurt by this. We're talking about electricians, plumbers, HVAC, etc, people we need to keep building that don't want union dues or extra layers of fees and administrative costs taken out of their jobs they bid on. Some of these people actually end up being excluded from jobs they should get BECAUSE of WFO. This is not for working people with families. Oppose this ordinance.

We recently purchased a office unit on county leased airport land expecting to grow our business in San Diego. We had our asphalt on our leasehold at Palomar Airport redone a few years ago, by a small family business. The cost was approximately \$35k. We approached the company used by Palomar Airport Operations which meets all the WFO requirements. That company quoted over \$100k and wasn't even available for over 6 months. Had that been my only option, I wouldn't have made the improvement. My employees deserve to be employed and paid a fair wage as well. Vote 2C or at least Exclude airports from WFO.

I am currently trying to receive my Flight Instructor license and if this passes I would have to leave the county for further training and a potential job. Passing this will be detrimental to businesses and citizens. Many people will lose the jobs they worked so hard to get. I strongly oppose this ordinance. Vote no (2C) or exclude airports from this.

As someone who is currently trying to obtain their pilots license, this would be detrimental to possibly have to

switch schools. With a high potential if this passes, having to find a school out of state. Seeing that this is supposed to help workers, it does not make much sense when people might have to leave the state all together to get their pilot license. It seems incredibly counter productive, with that said I oppose.

I have been a business owner at Palomar Airport for over 30 years. 15 yrs ago, the County decided it wanted our leasehold for its own use as administrative buildings, and was fully prepared to end our business. We found a new leasehold which we had to purchase and improve. This ordinance will destroy the value of our leasehold and end our business along with several other small, family owned businesses at the airport. Vote no (2C) or at least exclude airports from this ordinance.

Though I appreciate and agree with looking out for workers, this Ordinance will have grave consequences for the businesses impacted. Even the DTA economic impact study confirms a \$22M loss, which in turn will cause some business to move or close, eliminating jobs. Add to that the reduction in the Airport Enterprise Fund, jeopardizing safety, and you would have to agree this Ordinance, though well intentioned, must be rejected.

I strongly Oppose this due to the fact, you'll be sabotaging people's education, as well their potential careers as well affecting the lives of hundreds of people. Not only this will affect the lives of many but as well waste even more resources to get the education that we don't have. Commuting to another area will cost more than It should. In regards to the proposed Working Families Ordinance and its effect on county lessee businesses: No one more than the Owner/Operator of a business knows the amount and form of compensation required to attract and retain skilled employees, while continuing the viability of the business. The passage of the WFO, as written, would remove much of the flexibility required to maintain this viability. Thus, the WFO becomes an expensive solution that's looking for a problem.

Even with the option that removes the Wage Floor, existing lessees know a Living Wage Ordinance is coming. It's spelled out as an option now! When it's time for them to renew, they won't. (One ground lessee says 90% of his sublessees are small businesses on 3-5 yr leases.) And when prospective lessees see they would have to eventually pay a Living Wage, they won't lease there. Loss of income violates the FAA's Deed Restrictions and Grant Assurances with the County. Hundreds of jobs lost.
