As someone with deep ties to San Diego, I'm writing to convey my strong support to AUTHORIZE ACCEPTANCE OF FUNDING FOR THE TRANSITIONAL HOUSING PROGRAM, HOUSING NAVIGATION AND MAINTENANCE PROGRAM, AND TRANSITIONAL HOUSING PROGRAM PLUS HOUSING SUPPLEMENT PROGRAM AND ADOPT RESOLUTION AUTHORIZING APPLICATION AND ACCEPTANCE OF ALLOCATION AWARDS.

These programs help low-income and unhoused communities get and stay housed. They will greatly decrease the number of homeless people on the streets, which will benefit the entire San Diego region. As a person with lived experience, I can say that these programs were lifesavers for those experiencing homelessness. We win the fight to end homelessness with leaders like you.
Thank you!

I'm writing to express my strong support for the authorization & acceptance of this crucial funding for these essential housing programs and initiatives. Furthermore, I support the adoption of the resolution authorizing application and acceptance of allocation awards for these essential housing initiatives. These programs play a critical role in providing much needed support and stability to our community members experiencing housing insecurity. As a person with 12.5 yrs lived experience, I can say that without these programs, I would not have had a fighting chance out there. With the help of housing navigation & the PATH program, I found my way out of what were very tenuous circumstances. These programs empowered me to take control of my situation so I could begin to rebuild my life. No one should dare to think of cutting these and other vital housing and homeless funding sources. If anything, we should be adding to these programs. This is a crisis

and must be treated as such.

ThankU

These programs sound good, but again, there are no documents beyond the bland assurances in the Board Letter, that the programs are actually working.

Moreover, the County has a budget deficit, so One way to save money in the long run is to consider the cheaper alternatives to standard construction methods Mark and I keep mentioning – 3-D printed houses, ‘tiny houses, and shipping crate houses. I also mentioned adobe houses. In addition, these can be built more closely following actual demand, so you won’t end up with a huge oversupply of houses if the need for new housing suddenly goes away.
