I absolutely OPPOSE amending our State Constitution to allow abortion.

It's good to know the Board of Supervisors has nothing better to do than support an amendment that would have to be effected at the state level to have any meaning (and that would still be subject to legal reversal by a judge, as happened with Prop 8, no?). Such a waste of time. Such disdain for constituents, too, and such moral bankruptcy, celebrating fetal homicide like this.

There are many voices for the rights of women. The babies who are aborted do not have the opportunity to voice their rights. All lives matter.

Women have finally progressed after decades of oppression; we are still not there but have been moving in the right direction. We can not go backwards and take away women's rights. No one should have the right to continue controlling us especially when it comes to our bodies. Its our bodies, please support continued safe choices for women. Taking this right will result in many women ending their lives to terminate unwanted pregnancies especially those that result in mental/physical trauma.

Abortion must be stopped. It is the Slavery issue of our time. It is the Holocaust that continues to this day. The Nazi's killed 6,000,000 . American's have killed 63,000,000 since 1973. We are supposed to never forget the former, but we have not learned according to the latter. It's time to learn. Stop the murder, stop the killing, stop abortion. Embrace life and the strength to be truly forward thinking, forward believing, and Green.

I am a Unitarian Universalist minister. I can speak for the Unitarian Universalist Association, including the congregations in San Diego county in unequivocally affirming the right to choose abortion. I also speak for San Diego Faith Leaders for Reproductive Justice in affirming that the right to choose is not only a constitutional right, it is an ethical choice. Those who oppose abortion can do so for themselves, but they cannot and should not be allowed to impose their beliefs on others.

Wake up and recognize what you are doing! Oppose this initiative; protect the lives of our beautiful unborn children. No one should ever have the right to kill another, especially those who are innocent, defenseless and vulnerable. Killing innocent children permanently scars and traumatizes the mother (and father) and damages society. Instead, support meaningful change to protect and nourish our unborn children, make adoption more accessible and help struggling mothers financially.

Babies whether born or pre-born are human beings from the moment of their conception. No one has the right to kill another human being, even that person's own mother. The "right" to kill babies has no more place in our constitution than the "right" to own slaves, or employ hitmen, or to poison rivers that happen to cross one's property, or abandon elderly relatives on hillsides, or any other atrocities that may have been popular at some times and places in history.

All babies are God's gift BORN & UNBORN! "You created every part of me; you put me together in my mother's womb. I praise you because you are to be feared; all you do is strange and wonderful. I know it with all my heart. When my bones were being formed, carefully put together in my mother's womb, when I was growing there in secret, you knew that I was there—you saw me before I was born. The days allotted to me had all been recorded in your book. _

We're turning a blind eye to what is arguably the biggest violation of human rights, breach of social justice, and denial of science that we've ever faced: legalized abortion, the lawfully sanctioned killing of an innocent human. Fertilization is the first instant when a full complement of unique human genetic information exists in a living thing. That is the most inclusive and liberal definition of the beginning of human life – of membership in the human race – that's scientifically defensible.

Abortion is a hypocritical contradiction to those fighting for the right to do it. We want the protection of "our lives" but if we can sweep one under the rug in order to grant ourselves some convenience, somehow that is OK. Are we gonna kill the mute next, because they have no voice? Slippery slope.

The "right" to choose ends once a new life is in vitro, the rights of the child developing in the womb must be protected, if a baby is not safe in its mothers womb, absolutely no one will be safe. Abortion is Child Murder, we know scientifically that the genetic blueprint for a "new" human is complete and intact with in the first 48 hours from Conception. That "life" left unmolested by chemical or medical destructive methods will develop into a complete human. killing its potential

I am in favor of this resolution. Every women has a right to control her own body. Men should not have the right to make decisions for her. If men were made to take responsibility for the baby they made via consent or force, this would be a moot point. Those who oppose a women's right to choose should vote for policies to support children from birth to 18 years.

We have laws to protect the common good so that we may flourish and give to those less fortunate than ourselves. California lawmakers have worked hard to rally for the poor and the under-represented by establishing programs to help many thrive. What group in humanity is most under-represented than the unborn? The pursuit of life is one of the three founding principles of our country. If we don't get this correct, making progress to end racism and other social justice issues will be unachievable. Science shows us that a life begins at conception. Once a child in the womb begins to grow, that constitutes life. If we don't start protecting the lives of the most vulnerable human beings we have failed as a society. Mothers and fathers of these babies being killed will suffer with depression and guilt.

Premeditated murder is not a "right" - it is a horrible moral evil that most would not wish granted to others if it meant their own lives were at stake. Abortion often involves the vivisection (often for great profit) of helpless human beings. In order to comply with such evil, people have chosen the euphemism "choice" to justify their mistaken thinking and blunt emotional response to the truth of the action. Please do not vote to facilitate this great harm!

Let's call the "Right to Choose" that you propose to "enshrine" in the California Constitution what it really is: the premeditated torture, dismemberment, and murder of an innocent human being. Many times third-trimester babies are aborted, and their organs are harvested while they are still alive, with no anesthesia--because the specimens have to be fresh. Now abortion supporters are advocating infanticide! As long as we support this barbarism, we cannot call ourselves a civilized society.

1) Abortion has nothing to do with a woman's body. The baby within her body is NOT her body. It is a separate living human being with it's own separate DNA. 2) Abortion is not reproductive care. It is reproductive murder. 3) abortion is not health care. It isn't healthy nor is it caring to kill a child; pre-born or post-born.4) Abortion is the right to choose to kill a child which is murder! Abortion is the killing of innocent life.

It has nothing to do with the health of women and harms them. Encouraging a person to murder their child makes you culpable in the murder. An unborn child is a distinct individual and not a political football. Do the right thing here.

Life starts at conception. Abortion is a "word" chosen by killers to make it sound like you are aborting some cells in your body (like clearing a computer program). It is murder. God created all life in His image. Abortion should not be used as a type of birth control and should not be included in the California constitution as a right. Murder is murder. I waited until December 1983, after I gave birth to another child, to have a tubal -no signature required. Adding a vague constitutional right to abortion to the State constitution is wrong. Issues of fetus viability and a woman's health should be argued on individual cases that set legal precedent for all. Absent that, it's better

to craft laws that specifically address current research on viability and health, that can be changed as science changes.

I watched my mother, age 42 at the time, married w four children, bleeding to death in our kitchen because her

MD refused to abort the fetus inside her uterus, which had been surgically altered, making a full term pregnancy impossible. Horrific for all of us. I was 17, raped by my boyfriend. Only way I got an abortion was by convincing three psychiatrists that I would harm myself if I had to continue the pregnancy to term. Just two stories from one small family back in the day.

I support the right to abortion by amending the state constitution. Women's rights are essential for the health of a community. Young people need to make this personal choice on their own. This impacts families and their future ability to care for their children. Men need to support this choice. The right to privacy means the woman and her doctor make this decision based on the woman's situation. No one else should be involved. Thank you. Thank you for bringing this forward.

As a progressive, it saddens me to see energy siphoned away from substantive issues. Abortion is a wedge the elite use to divide us. Please use your time, power, & money to prioritize universal healthcare, more egalitarian housing programs, better parks, beaches, etc. If you care about women's equality, raise the pay and respect in female dominated positions like early childhood education, nursing, etc. Do not waste our energy on the political piñata named Abortion.

Until an invisible man in the sky actually shows his face on earth, the mother is the only being who can wean a healthy baby. Abortion is in part a moral issue, and there should be restrictions on late-term abortions. But anti-abortion zealots

want to force their morals on everybody. Normally a constitution should cover general governmental structures and functions, not hot social issues. But abortion has become such a divisive national issue that legislation might be too easy to overturn. So a constitutional amendment might be a more permanent solution.

I know the terror of an unexpected pregnancy with health complications. I was grateful that safe and legal abortions were available when I needed mine, even if astronomically expensive. My mom didn't have that option, pre-Roe. Even though her abortion was medically necessary, she had to leave the country to have an abortion in a questionable facility, with a researcher who wasn't a doctor. My mom hemorrhaged, and was lucky to come home alive. Legal abortion ensures safe health care for women.

Morally and ethically, it is not the government's place to decide or punish an individual for exercising bodily self-ownership. Pragmatically, a ban on abortion will not stop them, but make abortions more dangerous and punish

vulnerable members of society, current and future. Amending the California state constitution to enshrine the right to choose will not only protect women's reproductive rights, it will protect all Californians' fundamental rights to bodily autonomy and privacy.

Those who don't want to have an abortion can CHOOSE not to have one, but for those who CHOOSE not to bring an unwanted child into this world, for whatever reason (financial, ethical, moral, take your pick), they should have that CHOICE. As a physician who provided health care to women of reproductive age, I am well acquainted with the need for access to safe, legal medical abortion. To see states restricting the ability of women to terminate an unwanted or life-threatening pregnancy is distressing. As an ObGyn doctor and a compassionate member of modern society, I fully support this measure- women deserve the right to choose what happens with their own bodies. If you want to decrease abortions, fully fund contraception and access to care.

The way I read the Constitutional amendment is that until viability, what is in a woman's body belongs to her alone. I also believe in the separation of Church and State, and it seems religion is dictating the choices of women.

I fully support Item 25. It is important that California be proactive and clear in no uncertain terms that WE WILL NOT GO BACK! The dangerous laws being passed in other states are horrifying. No women should be forced carry out a pregnancy she does not want. Women must have full bodily automony. California must be a beacon of refuge for women across the country facing persecution. Thank you Supervisors Vargas and Lawson Remer for drafting this proposal!

Supreme Court decisions should never be reversed once they have become law. When they are, they become about the political party who has the majority of seats and not about the rights of the individual. In this case, Roe v. Wade has become a political ploy of some justices in the Supreme Court and based on religious beliefs. As a Christian, I understand some of their rationale, but this should not be a religious decision but one of equity and choice.

As a woman who survived pre-Roe laws in the early 1970's, I will always adamantly support a woman's right to choose. The men with small penises who try to control women's reproductive rights should just get a vasectomy, and save the world from more of their feeble-minded off-spring.

I have a grandson who weighed 1lb 2oz at birth. Many babies aborted are closer to term than he was. Live babies are being killed... it's called murder. My grandson is a normal, smart, healthy little boy. There are families

waiting to adopt children whose parents aren't able to care for them. There is no logical reason to murder them. Pictures of babies trying to get away from instruments used for abortion are sickening. A conscience cannot be clear after watching this.

While I have watched with horror and disgust the decades-long attempt to politicize the issue of reproductive health care, I have always felt that my rights would at least be recognized as long as I lived in California. With the most recent events, I no longer feel that is the case and it seems that banning abortion within the realm of possibility in a Republican-led Congress and White House. It is therefore essential the state be pro-active in protecting this fundamental right.

I cannot and will not return to medieval times. Its my right to determine what happens to my body. Without the right to choose I am being treated like a lesser being, A second class citizen.
