What? This catastrophe has not yet been resolved by Supervisor Aguirre, formerly Mayor of IB? Always the promise to resolve and be the hero. Always wanting more and more money without resolution. Ready to blame Mexico?

The TJ River Valley Pollution Crisis is now spreading Countywide. This is more than a crisis, more than an emergency. But your response has been mostly to seek external money or resources which take months and years. We need local action which would be quicker. It is affecting people's daily lives. DAILY. People are getting sick or worse. You mention local efforts in the last paragraph. We need action now, not in the future, Not when Congress or the State can find the money to act.

I have previously mentioned several possible solutions, the main one being handheld pollution monitors to find out which buildings and where exactly the pollution is coming from. Look 'em up!

But I cannot support the continuation of what is essentially an industry based of promoting the emergency rather than fixing it.
