Good Afternoon, Supervisors,

**What can Scotland Police teach about global large-scale events that is in your procedures or rules? I am aware that you are not following your own training manual procedures.**

**And I hope it I not some kind of planning for those crazy UN plans like Agenda 2021 or 2025 where we all surrender our nationality and our rights in hopes that the likes of Putin, Maduro, Xi, Kim Jong II, and all those guys will treat us as individuals. Where we go paranoid about pretty much everything, especially decarbonization and climate change, and the occasional heat wave or meteorite. Where we confine ourselves to 15 minute cities and stack & paks galore.**

**But I'm glad this only costs us \$2,400 in contrast to the \$40K bill to send Joel & Monica to the Vienna housing conference (and it's our taxes but we haven't hear the report yet.) So kudos to the office.**

Regards,

Paul Henkin
