After watching LA Fires and the Moss Landing battery plant fire, we cannot to wait until the next disaster strikes. Valley Center cannot afford to place one more Battery Storage facility in our area. We've already experienced multiple fires. We would like to see more investments in hydro energy. Fiscally it makes more sense to invest in preventative measures than to pay for homelessness as a result of a fire.

Your fire-safety review must also include re-vising BESS policies to preclude projects in VERY HIGH Fire Severity Zones. Your own Climate Action Plan indicated it was too dangerous to build new housing in those areas. To bring fire-prone projects into those areas puts financial liability on the County.

Please include the siting of BESS facilities OUTSIDE of extreme fire danger areas in this comprehensive review and Program. Thank you.

3 million people reside in this county and will not be at this meeting to hear this information. Consider a campaign to reach out to the residents with this valuable information.

Let me guess – their old continuum failed so they need a new one, hopefully more inclusive of the entire County as we have suggested. But this is no change.

The Board letter mentions that the County needs about 400 beds. But then, the only hospital mentioned is in recommendation 2: “Direct the Chief Administrative Officer (CAO) to enter into discussions with Prime Healthcare to expand the number of behavioral health psychiatric acute inpatient beds available to people who are Medi-Cal eligible within Paradise Valley Hospital.” So, cram 400 beds here? But more concerning, restrict them to Medi-Cal eligibles when the problem is all over the County.
