You should built cheaper housing which is quicker to build - 3D printed, tiny homes, shipping crate homes, maybe adobe homes, as we keep telling you. These would not only be cheaper but also keep up with the market for new homes better instead of houses that might not be built for years and then it would be less likely to end up with an oversupply of homes.

And there needs to be more than 5 or 10 percent of truly low income housing (30% AMI per HUD.)

5370 Napa St. – Nice area, with a nearby pool and park, and nice amenities. However, it provides its affordable housing only for those at 30 to 70% AMI, it does nothing for truly low-income people. In fact, this time, the Board Letter boldly proclaims an average of 60% AMI and will not be available soon anyway. Again, not sure why no speakers at the Public Hearing. Was it advertised where people are likely to see the notice? You should reject this development,
