I am a faith leader in San Diego and I firmly side in support of making sure that safe reproductive health services are available to everyone, all of the time. Any limitation of these services will directly impact those who are already marginalized by the health care system. Healthy people = healthy community.

Thank you for considering the important issue of reproductive health. As faith leader, I strongly support a comprehensive assessment of reproductive health services and for insuring that reproductive services are

available to the people of San Diego county. I know you will not be swayed by ideological positions that seek to impose a restrictions on the rights of those in need of these services, whom will be those who most need access.

The language shouldn't be 'Reproductive Health'. It should be 'Womb Baby Services'. Let individual doctors help pregnant women make decisions. Planned Parenthood is in the business of selling womb baby parts. It is a corporate special interest, and therefore if allowed to operate in San Diego County, there should be 100x+ the money value of helping women to deliver their babies. Consider Heartbeat International services for San Diego County. -A smile at 18 wks. A womb baby has an emotional soul.

Thank you for taking this important step to assess the sexual and reproductive health care services offered by the County and its health care contractors.

It is more important than ever for states and local jurisdictions to stand firmly in supporting everyone's right to decide if and when to start a family.

It's crucial for San Diego County to continue to serve as a champion and model for reproductive freedom. I urge you to support this action.

Abortion is not "Health Care." Pregnancy is not a disease that needs to be "cured."

NO! My money, my choice!...Pay for your own abortions! Good God, you won't stop will you? This board is a runaway train wreck..

Remember, trust the science? At conception, SCIENCE, proves there is a complete individual HUMAN with it's own DNA.. FACTS!!

Such hypocrisy on so many levels.. There are more laws protecting sea slugs and eagle eggs, but nah, kill those innocent, defenseless humans.

"Reproductive health" is a euphemism for abortion. Abortion is not healthcare; it's murder. Is the comprehensive assessment called for in this measure really going to quantify real health services are done at abortion providers? Services like well-baby checkups, ultrasounds, heart-beat monitoring. Former abortion workers have disclosed that 94% of services killing babies. These abortion providers target to harvest 4-6 abortions from each young girl in age range of 12 to 17.

State funds should not be used for procedures which directly target to end a human life. I could support a measure which provided funds for procedures which would save a woman's life in cases of emergencies related to pregnancy. It would provide funds when all other means to save the mothers life have been exhausted and

the only way to save the mother is a procedure which might cause the death of the child in utero, but does not directly target the child for death. Such situations are rare.

Planned Parenthood Action Fund supports this letter introduced by Chair Fletcher and Vice Chair Vargas. We know that banning abortion does not take away people's need to access abortion care. Patients who need to access abortion should not face shame and overwhelming hurdles to get the health care they need. And they should be able to access a safe procedure, on their terms.

I oppose any care that stops life from flourishing. I agree that reproductive care is important and that all women should have access to high quality care throughout their lives, but abortion is not reproductive care. Abortion damages and destroys. Reproductive care should help women thrive and flourish to achieve complete health and strength for the body and mind for their families and their communities. I oppose any abortion services that are masked as reproductive care.

Women's March San Diego expresses our unequivocal support for this proposed action. Among our unity principles is the believe in Reproductive Freedom. We do not accept any federal, state or local rollbacks, cuts or restrictions on our ability to access quality reproductive healthcare services. This means open access to safe, legal, affordable abortion and birth control for all people, regardless of income, location or education.

Submitted At: 8:59am 05-21-22

I strongly oppose this. There is no danger that women's healthcare is in anyway being diminished in San Diego county. Planned Parenthood is a billion dollar company and they need no more of our public funds. And frankly if I have to pay for a boys circumcision out of pocket because it's not covered by insurance then you can pay for your elective services too.

**Madeleine Morales**

I support item 24 on the agenda. Every woman deserves access and to decide the direction of their own reproductive health care.
