[Zachary Zeilman](#) at April 09, 2024 at 1:06pm PDT

Support

Please support of SB 1178, which would require companies of 2,500 or more employees doing business in CA to disclose wastewater discharges that contaminate CA watersheds & mitigate it themselves or pay a fee. We are hopeful this legislation will include US-owned companies operating in Mexico who contribute toxic waste to the Tijuana Watershed with little oversight. The stormwater/wastewater impacting our shared coastline has become an environmental justice crisis and we must act now. Thank you.

Support

Help stop these polluters and hold them responsible!

•

[Jasmine Mikesell](#) at April 09, 2024 at 10:02am PDT

Support

Please support SB 1178, as transparency from our polluters is the first crucial step to clean water for everyone. We need to hold companies accountable for the negligent harm they cause to our environment.

• [Tom Cook](#) at April 09, 2024 at 9:44am PDT
Support

Please support this first step to hold corporations responsible for polluting our waterways. Extend the boundaries to 50 miles from the US/Mexico border to improve water quality at our south county beaches. Fees/fines should be set at levels that consider the loss of recreation and tourism revenue at our south county beaches. Thank you for your consideration.

• [Janis Jones](#) at April 09, 2024 at 9:36am PDT
Support

Please support SB 1178. Companies of 2,500 employees or more that conduct business in California should be required to disclose wastewater discharges that contaminate our watersheds and they should be held responsible for mitigation or be subject to a fee. US-owned companies that operate in Mexico and contribute toxic waste to the Tijuana Watershed with little oversight should be included in this legislation.
