Support

Much as I appreciate the County's response with flood relief funding now forthcoming, a larger issue remains: all due reparations. Flooding along Chollas Creek and its historic watershed confronts us with a long-term opportunity. An essential first step: formal acknowledgement that recent flooding is a clear impact of 100+ years of harm changing a once bountiful stretch of Kumeyaay land to a damaged set of enclaves where red-lined populations were pushed to settle. Then follow up with remedy.

Neutral

What does COVID have to do with this?

But I also do not like that the County is putting all this money on just District 4 when they represent the entire County.

I would rather see this ARPA money go to the First 5 Commission, which has a legitimate COVID claim, and other County fund go to the flood victims (who probably need more than \$474 thou anyway.)
