Those that are inflicting harm on others should be held accountable for their actions.

I strongly support County backing of AB 847. Transparency in law enforcement is non-negotiable. Ending the blanket confidentiality of peace officer records is a vital step toward accountability, public trust, and true community safety.

Alliance San Diego supports AB 847 because it provides police oversight commissions with equal access to critical personnel records, increases transparency into police and sheriff department policies and practices, and helps ensure law enforcement misconduct is investigated, disciplined, and not hidden from the public. By helping ensure that investigations are thorough and fair, AB 847 will increase accountability and strengthen community trust in law enforcement. We urge the Board of Supervisors to vote yes to support AB 847.

Please vote yes for this. Police must be as accountable as anyone else for violent acts.

I believe police officers should be held accountable just as everyone should be for their actions.

I urge the Board to support State Assembly Bill 847, as a District 4 resident. The current system prioritizes the privacy of public safety officers, who hold a monopoly on permitted violence, above public safety and public oversight. AB 847 provides a fair compromise between privacy and the public's right to oversee its public employees, Please support this bill.

Remove confidentiality of records of "peace officers" so they can actually be held accountable!

The community deserves to have transparent access to records related to law enforcement officers. They are not above the law and yet have shown time and time again that they get away with misconduct of all kinds with hardly any recourse. This is damaging to the community in so many different ways and considering how bloated the police budget already is, the least our government could do is provide transparency so that incidents can be properly managed and reviewed to improve our process moving forward.

For there to be accountability there must be transparency. But I also wish to repeat what M. McLeod has said: San Diego taxpayers have paid nearly \$100M in settlements related to Sheriff's Office lawsuits in the past 6 years, many for in-custody deaths. County residents footing this bill too often don't know how, or even if, anyone involved in these expensive deaths was reprimanded or disciplined. AB847 would let citizen law enforcement review boards, like San Diego's CLERB, confidentially access personnel records when they investigate such cases, giving the Board a fuller picture on which to base their findings of fact and make recommendations for change.

The police are paid with money from the communities they take an oath to protect. Their behavior should not be confidential from the people they are supposed to protect.

Community members deserve this transparency.

We deserve to be able to know everything about peace officers in jails when people are dying

For there to be meaningful accountability, the public need to know when and if police officers have been cited and disciplined for misconduct.

I strongly support this bill and hope the board of supervisors endorses it as well. Cops and prison staff who engage in negligence shouldn't be able to hide behind the protection of a "personnel file", including Chief Wahl. They should be abiding by the law themselves, and be above reproach.

I think that not allowing officers of the law to hide behind confidentiality is an important part of the legal process, so I approve this message.
