First, wait and see the fall out from the current federal administration and provide a final report 10/31/2025.
Second, hopefully this committee was on the lookout for fraud.
Third, no more free healthcare to illegal foreigners.
Fourth, people should be encouraged to take responsibility for their health and not depend on government handouts.

So the basic premise seems to be getting the State to increase Medi-Cal and Medicaid reimbursement rates, thereby letting County off the hook for the inequities it has created.

Interesting. The Board Letter says that Healthcare Payments Data showed that Medi-Cal beneficiaries in San Diego County had higher prevalence of asthma, heart failure, diabetes, stroke, chronic obstructive pulmonary disease, and chronic kidney disease, compared to those enrolled in commercial health plans. Well yes. Lower income people are sicker in general, mostly because of the environment and having to work extra, enjoy life less, and worry more about their future. Maybe fix this, instead of Medicaid reimbursement rates. Limit rent increases. Make more units available to very low income people. Stop putting kilns and other pollution sources in residential areas. There's a lot you could do yourselves.
