Hi Supervisors,

I had a change of heart. I now favor extending the COVID emergency. Not your fake emergency. THE emergency for 90% of the County. You need to trash the old emergency declaration and write one that is applicable to the present. No more vax or mask mandates. No more pushing the defective deadly vax.

The reason: Shawn reminded us 9/13 that there are now just about as many deaths from people who had COVID at some point (or maybe still have it.) I hadn't realized that this was happening here to this extent. But here we are. From September 1 to 24, there were 9 deaths among the vaxxed and only 4 among the unvaxxed, FROM YOUR OWN DATA. Follow the science. You need to stop trying to get as many shots in as many arms as possible.

I sent you the scientific articles 12/01/2021 and I don't know how many more times. The mRNA "lights up the liver like a used car lot" and circles around to the other organs. Anyone who takes it can get myocarditis, SADS, organ failure, etc.

The mRNA vax is a quick fix, but we will need special care and funding, probably until the youngest person who got shot up passes on.

This COVID/mRNA disaster will be here for years to come.

Monkeypox - you swept under the rug as it deserves.

The Brown Act has allowed remote meetings for years, but has several requirements, like letting the public know where the official is calling from. You need to start doing this. If your location is secret, there will be doubt whether you are in the district as you should be under the Brown Act. Dialing in from the spa should not be a perk of office.

Regards,

Paul Henkin
