I strongly urge a NO vote on Item 25. If women are to truly have a choice, they must have a choice to keep a baby as well as abort it. This Item 25 reeks of control of the reproductive rights of women.

Please do show and tell how crisis pregnancy clinics are fake and fraudulent. Pregnancy clinics provide necessary reproductive healthcare for women and children; for pregnant women and the humans being made or produced inside of them. Crisis Pregnancy Centers also provide an alternative, a different option or a different choice to women who are pregnant. Unfortunately, its just not a choice Planned Parenthood wants or likes.

Moving to shutdown these centers would intentionally harm members of the community. A movement to enable the shut down of these centers that provide tangible, reliable resources and care to those in need is damaging to the equality, mental and physical health of women, couples, and the community at large. There are robust, data-driven reasons as well as countless stories that clearly show why this should be opposed.

Pregnancy centers should be dedicated to providing healthcare, not pushing anti-choice agendas and forcing people to carry a fetus they don't want. Forced pregnancy is heinous, and there is no legal precedent for using someone's body to sustain or save someone else's life.

The phrase used to support abortion is "pro-choice". Using government funds to bad mouth particular organizations is sending women the message that we aren't smart enough to make our own choices. We are allowed to vote, but we need to be told HOW to vote about our own bodies ? Seriously ?

Pregnancy Resource Centers meet the needs of low income families by providing food, diapers, clothing, baby shower items when baby is born, clothes for mom and help finding, jobs, schools, housing etc. Often they provide meals and gifts for holidays to the neediest of families who would otherwise go without. PRC's provide much needed services for families in need. They need our support.

I oppose shutting down legitimate and pertinent resource centers for women and families. These centers have helped innumerable people by providing options and resources to make the best decisions for themselves and their families. Closing these centers would be a travesty. The allegations are unfounded.

These Centers are a valuable resource to the most vulnerable women and mothers. These centers pose no threat to Planned Parenthood. They simply provide an additional resource for those women that seek support during their pregnancy where they might not otherwise have support. Please do not make them use their funds to fight litigation when their simple goal is to support women in their most vulnerable state by providing resources to help them maintain a pregnancy or provide for their children.

We have worked hard to build our local Crisis Pregnancy center. There surely are already laws on the books to deal with fraudulent pregnancy centers. It is a worry that this bill may open the door to shutting down legit pregnancy centers by the abortion lobby.

This item is offensive and biased even in its title. Crisis pregnancy centers help women with crisis pregnancies. They are neither fake nor fraudulent. They provide many services, including helping a woman decide whether they may want to choose adoption or care for their coming child. They provide supportive services during and after pregnancy. If you consider yourself pro-choice, why would you want to shut down centers that are dedicated to helping support one range of those choices?

Aubrey Kellerman

Why in the world would we want to limit support and resources to women solely because they are interested in possible options to abortion. It would be false and fraudulent if we as a society do not provide ALL options to women in crisis pregnancy.

CPCs are anything BUT fake. They provide desperately needed resources to help women in crisis pregnancies - from newborn care & financial planning classes, baby clothes to medical care. They provide a true CHOICE to women, so they can feel confident to choose life if desired, & hope when others do not. Planned Parenthood should be considered fake because they don't offer choices, only abortion, which tells women they are not good enough to have a baby & that their child is not worthy of life.

I oppose measure 25! The board-certified medical personnel at these centers provide free critical healthcare to low-income women, including pregnancy verification so they can access state benefits, limited obstetric ultrasound, STI testing, and early prenatal care. If they shut their doors, thousands of San Diego's most vulnerable families will be left without critical support. Having personally met many people who both work at these centers and have been helped by them, I urge a NO on Item 25!

Pregnancy Care Centers provide an alternative resource to abortion for those women who find themselves pregnant but for various reasons may not see abortion as a satisfactory solution. Agenda Item 25 seeks to eliminate that resource. The fundamental proposition of those who support abortion rights is that women should have the right to choose. If this is the case, women should have the right to choose to consider the services of Pregnancy Care Centers.

Crisis Pregnancy Centers are anything BUT fake or fraudulent. They provide actual resources to help women in unexpected pregnancies - from newborn care classes to medical care - providing them with the confidence to care for themselves and their babies. They provide hope & support when others do not. It is places like Planned Parenthood that should be considered fraudulent because they do not offer these services, only abortion, which tells women they are not good enough to have a baby.

We need people to lend support to women who think abortion is their only option. Many times these women really want to keep and raise their babies; they just need some material, financial, and emotional support. The wonderful thing is there are many competent and caring people willing to do so. These clinics are providing care these women need. The women are not coerced they still make the final choice not the clinic.

Strongly oppose! The Pregnancy Care Centers should remain open. By trying to shut down the pregnancy centers, San Diego is actively removing support from women who need it most solely because they disagree with the position of pregnancy centers on abortion. Just visit one of these centers and meet the people who work and volunteer there as well as any of the 1000s of women to whom they have offered tender emotional support and have helped with real material needs such as housing, diapers, strollers, jobs...the list is endless. Pro-life people are often accused of caring only about unborn babies while doing nothing to support women in need. I strongly oppose the passing of Item 25, as closing these integral crisis centers would leave women with even less options to consider, once pregnancy is discovered. Not all women desire to go the route of termination of pregnancy, and want to explore other options, and crisis centers offer more options and RESOURCES. By passing this, you would be leaving women with even less choice, forcing them to make one they may never have wanted to make in the first place, being termination.

It is biased and inappropriate to assume that clinics other than Planned Parenthood are spreading misinformation. Pregnancy centers that share information and encourage life, and not killing unborn babies, is not misinformation. They allow women to see all of their options and actually pursue what it could look like to give their baby up for adoption etc. Showing women that there is another option besides abortion is not wrong, it is fair to the unborn baby who doesn't even get a choice.

While it is true that many pregnancy centers offer information against abortion, they cannot force someone to not have an abortion. Before someone does something as life altering as having an abortion, they should be able to be aware of both sides. Ultimately it is the individual's decision, but they should be equipped to make an educated decision. Pregnancy centers to not force anyone to do anything, they simply provide information and tools and information.

Dear San Diego County Board of Supervisors,

I urge you to take action against fraudulent Crisis Pregnancy Centers – also called “CPCs” or “fake clinics” – from harming our communities.

I'm interested in what evidence Sup.Terra Lawson-Remer has that Crisis Pregnancy Centers are "fraudulent and fake clinics". If one is "pro-choice", surely the "choice" to keep one's baby should be acknowledged. These centers give loving care to the mother and after birth, to the baby. All services are provided free of charge. Many educational resources are provided and free diapers and clothing are available. It is difficult to understand why someone would be against these services.

Pregnancy centers are an alternative for expecting women. Much like how abortion centers like Planned Parenthood support the use of abortions, crisis pregnancy centers support the continuation of the pregnancy to term. They offer help to mothers seeking options other than life-ending abortions and support even after the birth of the child. To close crisis centers would just be in interest of making more money with an "expectant" increase of abortions and not in consideration of women's choice.

Gregory Baker

If one is truly "pro-choice" & not just "pro-abortion" as you claim to be, you really need to present all options. Abortion mills do not present choices; they force a pro-abortion agenda. If those are allowed to exist, then pro-life pregnancy centers should also be allowed to exist so that pregnant women really are presented with all options. I would be shocked to hear Planned Parenthood give a woman the option of giving her child up for adoption.

Somebody needs to present that since they won't.

These clinics provide many services including help for mom after the baby is born. This is a frivolous measure that does not help women but promotes abortion as the only option. We already have systems in place to check on ALL clinics to ensure they are properly licensed. This is just a way to shut down businesses and it is un-American.

For something to be defined as health care there must be a disease it is treating. Pregnancy is not a disease.

The current American society pressures young women to be both sexually active while simultaneously liberated enough to believe murdering their children is healthcare.

Pregnancy crisis centers are needed now more than ever. If it's not a human baby then there's not a pregnant human.

Round2: I would ask you to search your conscience for the reason why you're trying to stop these pregnancy resource centers. Is it because you believe they are truly harming women, or because you disagree with their pro-life stance? These centers provide counseling, ultrasounds to confirm women are pregnant, and some provide medical care. Planned Parenthood doesn't recommend carrying to term or adoption, so why should faith-

based centers recommend abortion? PRCs are a choice women need.

Firstly, tax dollars should not be spent as essentially advertising for-profit businesses. Planned parenthood is in the business of abortions. All other services are centered around this profitable enterprise. They provide zero services for new mothers, no diapers, no formula, no shelter for battered women. If an expectant mother doesn't not want to abort their child, then a crisis pregnancy center is her only hope, as planned parenthood will be of no help.

To force the closure of these supportive centers is just to try to get more business for abortion centers. Pregnancy crisis centers are to help expectant mothers who have chosen to stray away from abortion. In Supervisor Lawson-Remer's Agenda Letter: "When safe and legal access to abortion and reproductive care is limited, restricted, or jeopardized—people of color, immigrants, young individuals, and people with low incomes are often the first to be impacted." This sounds disturbingly like she wants abortion to be especially available to people of color. Why is that? People of color and others deserve to have the option to use pregnancy resource centers, which are a longtime help to the community.

I speak in opposition to this proposal. Pregnancy centers provide so many services to women that if deleted would have these families either fall through the cracks or become a burden to government agencies and medical clinics. Many centers support women into college and continue to provide for families as they grow not just during pregnancy. Most pregnancy centers are funded privately-how can you draft legislation telling a private institution it can not operate? is this legal?

To call a Pregnancy Care Center a "fake clinic" seems a snarky doesn't it? To help a woman have a healthy and happy pregnancy is just too much sentimental nonsense for so many people now a days. So the hate that people have in their hearts expresses itself in taking the life and hope out of others. Kill and

I support a woman's right to choose what is right for her own body and soul. How dare you assume you know what's best for her!

This is true today, and was also true in 1985 when I got pregnant at age 24. A fertilized egg becomes a peanut-sized mass of living tissue. It is not yet a baby, let's be real here.

All these nonprofit centers do is give pregnant women more choices--for free. These extra choices are essential. 96.6% of PP's "pregnancy resolution services" are abortions (20/21 annual report). Everyone should have access to the high-quality health care and medically accurate information they need to make the best decisions for their health, lives, and futures. At a time when reproductive rights are under attack like never before, we need more access to reliable and high-quality reproductive health care, not fake clinics.

I am a volunteer at a local pregnancy clinic. Our clinic is accredited, professional, compassionate and provides so many services that benefit our underprivileged community, including diapers, wipes, formula, education, STD testing, verification of pregnancy in order to receive benefits. We also provide free backpacks to kids, photos with Santa & genuine respect and love for our patients. Taking the source of these valuable resources away from people already in need makes absolutely no sense.

The accusations made against these clinics are unfounded. These clinics provide free pregnancy tests, free ultrasounds, life skills education, ongoing support for parents, referrals to needed resources, etc. Regardless of what one believes about abortion, these clinics provide important services to the community. Spreading a false narrative about them is a disservice to your community. Please make sure you visit these clinics, talk to their medical directors and clients before you vote again.

I used to work at a crisis pregnancy center and I can tell from experience that the employees deeply care for every one of their patients. The staff are highly trained professionals and the ultrasound nurses go through all necessary training to stay current with California's standards. All patients deserve unbiased, comprehensive education about the medically appropriate options for their own individual circumstances. We need to target fake crisis pregnancy centers that subvert patient autonomy by misleading patients about their ultrasound results, creating administrative and legal hurdles to seeking care, and lying to patients about the safety/risk of each of their options. These "clinics" are manipulative and predatory. If the patient wanted to go through with the pregnancy, they would consult an OBGYN. People searching for information to terminate a pregnancy are under enough hardship without having to navigate these fake clinics. Many people who have an abortion will have a child later. People concerned with "saving lives" should look at the homeless population. To anyone who opposes abortion: take in a homeless person and give them a permanent home.

Many Crisis Pregnancy Centers don't have licensed staff. CPCs don't provide abortion care, & don't share honest, accurate facts about sexual health & pregnancy options. These centers have no trained medical staff, and are a danger to communities. I'm in support of efforts to take action against fake clinics. These crisis pregnancy centers are in no way "fake or fraudulent," when they provide many of the exact same serves that other clinics do, such as free ultrasounds and testing. People in low income areas especially need

American Casualties: Abortions In The US Compared To World War II

The number of American babies killed by abortion each year is roughly equal to the number of United States military deaths in all U.S. wars combined.

Abortion is a stain on America. And the God who gives life will not hold us guiltless. Thomas Jefferson wrote, "I tremble for my country when I reflect that God is just and that His justice cannot sleep forever."

There have been no complaints, no investigations, and no evidence to support closing pregnancy resource centers. Closing pregnancy resource centers removes an alternative to abortion, which likely is the real goal.

Many women do not want an abortion. Their choice must be equally respected by preserving pregnancy resource centers who refer clients for healthcare, provide diapers, clothing, rent, job and school applications, and help vulnerable family members. This proposal is discriminatory.
