I'm glad to see that there has been substantial progress made in improving road conditions in the County. So when's the party and I hope everyone's invited without having to agree to follow the Board's dictates like the Independence Day bash.

On the other hand, the 0.6% of roads in very poor shape and the 6% in poor shape should be easy to fix up – especially the few roads in very poor shape.

Since the same program fixes culverts, curb ramps, and things like traffic lights, I am wondering how many of these are in good or very good shape and poor or lousy shape.

I am a bit alarmed at the discrepancies by District, although spread over 9 years – that districts 3 and 4 have only about a third of their roads resurfaced while district 5 has almost half. It would be nice if these numbers were equal.

And the Board Letter mentions AI analysis. Considering that AI has no conscience, this is not a good idea.

Congratulations to DPW!
