They Sheriff's Dept is asking for a military grade vehicle based on 1 scenario in a suburban area, but promoting this as use for rescue missions in Urban areas. This equipment will only further polarize the Dept and escalate interactions with the citizens of San Diego County. If they can provide rescue scenarios in which this has been used, instead of combat scenarios then it could be considered a peace keeping tool. They need to learn how to de-escalate, not dominate community members.

Not sure how an armored, ballistic-glass-plated vehicle would enhance rescues, and the "variety of attachments" sounds a bit like my vacuum cleaner. Not sure how it would deal with obstacles - just ram through? Not sure this is a good idea, might cause more damage to property than actual good.
