Always a good idea to track the homeless and the reasons for their homelessness. It would also be nice to have comments on the adequacy (or not) of their shelter arrangements, or how long they have been on a waiting list.

And you should built cheaper housing which is quicker to build - 3D printed, tiny homes, shipping crate homes, maybe adobe homes, as we keep telling you. These would not only be cheaper but also keep up with the market for new homes better instead of houses that might not be built for years - and look at all the time extensions you grant.
