Higher Gas tax is not good. I am retired so I drive only about 15 miles a week and only do that because I live 5 miles from grocery store . I cant afford to go buy a hybrid or electric car and rent so would have to drive ten miles to a charging station to charge up. Others drive for their work, tradespeople usually and the RENT and buying a house is is so high even people who make good money cant switch to cleaner vehicles just yet. Maybe Musk can start giving his cars away.

I agree completely. We cannot tax the people of this County or State into oblivion.

Adding a tax on users of gas is discriminatory. Besides, EV's have the potential for much worse things, like lithium-ion batteries reigniting spontaneously, excess battery weight causing increased damage in a collision, the high burning temperature (4,000 degrees or so) keeping wildfires going, insurance up, the high cost of replacement batteries, and so on.

And we should put the brakes on housing prices by capping rent increases at the cost of living rather than an arbitrary percentage. And we need to control utility costs.
