Please accept these funds and cause them to be used as effectively as possible to reduce the cross border pollution and remediate its impact on human health, the wildlife, and the habitat values of our Border area.

The TJ River Valley Pollutio Crisis is now spreading Countywide. This is more than a crisis, more than an emergency. But your response has been mostly to seek external money or resources which take months and years. We need local action which would be quicker. It is affecting people's daily lives. Daily. People are getting sick or worse. You mention local efforts in the last paragraph. We need action now, not in the future, Not when Congress or the State can find the money to act.

I have previously mentioned several possible solutions, the main one being handheld pollution monitors to find out which buildings and where exactly the pollution is coming from. Look 'em up!

But I cannot support the continuation of what is essentially an industry based of promoting the emergency rather than fixing it.

Hopefully, the Navy's TJ River Valley Le Sage Restoration Project will improve the air enough.
