What state of emergency? Enough is enough. Let's focus on cleaning up our city. The tents and the homelessness situation is completely out of control. The government over reach is completely out of control. We all know the only reason you keep the state of emergency and want to continue is try to take the control away from the people. There is no emergency. People are going to work. People are going to games. People are celebrating in huge festivals and parades. What emergency?!

Strongly Oppose! This is unbelievable that there is even a meeting for this. You should not be concerned with monkeypox, you should be concerned about keeping the community safe from crime, work with homeless, and deal with all the drug issues. You should be ashamed of yourselves.. This is another plandemic to take more money and try and control the people. God is watching!

Do not declare yet another 'emergency'. The County believes in 'data-driven' approaches, so start following (and making decisions upon) the data.

Monkeypox numbers do not rise anywhere near to 'crisis' or 'emergency' levels.

Your desire to 'align with State standards' should be called what it really is ... 'Moneypox'.

I oppose this measure to use monkey pox as reason to declare a state of emergency. But look how easy it is for the Board of Supervisors to keep the residents of San Diego in a perpetual state of emergency! Shameful behavior! I hope to see better choices and leadership that empower the residents rather than the constant fear mongering.

Why do we need to declare a State of Emergency for a non-lethal disease that is transmitted mainly through skin to skin, sexual contact? There's been 6,000 and no deaths so far in the U.S.
It seems like a knee jerk reaction with the intent to put more fear into the population. Public Health announcements on prevention and treatment are all that should be needed.

Your continual pushing of fear for money is in direct conflict with your oath of office. It's time to stop the dictatorial control. This continual division must end. There is a short window for this to end before daddy God gets involved and takes care of things. The only true emergency the people of San Diego county are currently faced with, is a runaway school board. You have already been complicit in crimes against our children. You have already hurt the social and psychological development of our children. You have already created policy based on lies, and propaganda. You really, really, really shouldn't do that again. Might not bode well for your political aspirations.

Why is Monkeypox a health emergency? According to the county, "The action does not indicate that San Diegans are at higher risk of contracting the virus." Dpesn't pass the test of "emergency." 27 confirmed cases and zero hospital admissions or deaths in San Diego and it is an emergency???

All that 'Flatten the Curve' did for COVID 19 was to prolong the inevitable of stretching out how long we endured getting past a flu virus and caused unnecessary disruption in people's lives and businesses, weakening the economy. Here we go again with a few politicians making poor choices for everyone lives once again. This is a gross lack of wisdom that once again will be harmful to all San Diego county constituents.

Please do not declare Monkeypox an emergency in San Diego and use city funds to combat a disease that has not killed anyone in San Diego. With real crisis, such as fetanyl, homelessness, and crime, our city needs to prioritize and take seriously issues that are real emergencies. There is no medical emergency. Just look at history; 2003 Midwest monkey pox outbreak and a few years before a mandatory smallpox vaccine campaign for military and healthcare workers. No one died from monkey pox. But

people sure did die from the vaccines. Post studies showed the vaccines ineffective. Now they repeat history. Nathan Fletcher, his voting block, and his outlaw HHS are ethically and morally corrupt. Their goal is not health, but rather power, control and money.

There is no need to establish a state of emergency for this virus given its mode of transmission, pathogenicity and virulence.

There are plenty of medical practitioners (albeit afraid to speak) that understand this does not spread like an airborne virus.

We do not establish a state of emergency for a much more virulent flu virus, that in a bad season will definitely kill considerably more people than this monkey pox strain. Act on true scientific information and data, and not based on politics.

I vehemently pose the further abuse of the county's declaration of a local emergency for a disease that doesn't even top other diseases, which should permit, by this logic, a local emergency.

The public can see this is a cash grab and another way for Supervisor Fletcher to Campaign off of.

Calling an "emergency" for a disease that has killed only 1-2 people is Ludacris and diminishes the word "emergency".

Have you issued a state of emergency for heart disease or cancer? No? Let's talk once we really do have an emergency....you can't just throw that out in an effort to launder more money & control the masses with FEAR. The People see right through you all. In the meantime, you all need to start doing your jobs & be responsible for your actions.

Monkey pox is very hard to get. It is only transmitted between homosexual males. This is not an emergency! Any supervisor who votes for this is an enemy of the people.attempting to impose tyranny via public health directives.

I really find this hard to believe. A "Local Health Emetgency"??? This is comete nonsense. Feel free to give advice to the public, but this affects such a tiny percentage of our population. This smells like a grab for power or someone making money selling a vax or something sinister.

Vote no!

Stop with the insanity! Monkey Pox isn't an issue so much as chicken pox, or the common cold is. You don't die from it and it's a physical contact issue. Create something to help those who get it and educate others on how to avoid it without shoving yet another unnecessary pointless yet harmful "vaccine".

Fool me once, shame on me, fool me twice, shame on you.

How about focusing on the group that this affects and flatten the curve, slow the spread ? Stop Homosexual sex orgies for two weeks. You shut the entire population in for the cold and flu season, shut our schools and churches, small businesses and ruined our economy. For what? All of you that mandated these actions and the kill shot will be brought to trial. Premeditated murder. Sudden death syndrome. Blood is on you hands.

This disease is only spread via very close or sexual contact. Also the reports are that only gay or men that sleep with other men are the only people eligible for a vaccine. How does this effect the rest of the community?

There is no emergency this is all for control. This is honestly very sad to see you continue to ignore the people. You clearly have an agenda and it's sinister. History will not be kind to you.

Stop with the insane edicts, everyone sees through them. Once the voting machines are removed and in-person paper ballots are the only option do you think anyone voting for this atrocity will be re-elected?

This is a joke, another tyrannical move by tyrannical totalitarian government. The San Diego County Board of Supervisors should immediately resign. Let the people have their elected positions back.

As of today, there are no deaths where monkey pox is listed as the cause in the US and very few outside of Africa where it is endemic and deaths occur yearly. Mr. Fletcher correctly stated in a mass email where he correctly called it moneypox, rather than monkeypox. I don't recall an emergency being declared in 2003 when there was an outbreak. Here we go again with another money power grab, inflation creation, and likely more control over people in America.

There are no monkey pox in the hospital here at UCSD. We are seeing ALOT of vaccine injuries/deaths from covid vaccines/boosters. A blistering rash is not an emergency! Stop this monkey madness and if you don't want diseases stop getting vaccinated.

Monkey pox is not a pandemic yet you continue to push the narrative about a state of emergency when we know it is just so can continue to funnel money and try to maintain your tyrant control over the people. We know what

you are doing and recompense is coming and it is real. I pray God have mercy on your souls for all of you are complicit in crimes against humanity.

Declarations of public health emergencies are unconstitutional and therefore null and void. The BOS has no authority to overstep the Constitution. According to WHO monkey pox occurs amongst men who have sex with other men. The overwhelming population of San Diego County does not engage in this kind of sex acts. This declaration is about money & control and not health. We the People of San Diego County are well capable of managing our health without your interference. Get off our backs & life's.

There is no need to declare emergency for monkeypox. This is not a disease that is "spreading like wildfire". There is NO emergency for monkeypox just like there is not an emergency for COVID 19. Stop spreading fear and propaganda.

This is another way to push a vax that will injure or kill people just like covid 19 vaccines.
