The CDC has updated its guidance. COVID is endemic, we are no longer in a pandemic. And since we asked you for criteria to end the SOE and your response was "we're waiting to hear from the CDC", when San Diego county going to drop the local State of Emergency? If you aren't going to end it, you must give us the criteria for ending it. Today.

Can you honestly still call this Covid charade an emergency and keep a straight face? Look around!!! CDC has even removed the bogus protocols. People are over this. And sadly the only ones dying. Or are the vaxxed. Stop the money grab and get back to working for the people. There is work to be done and Covid is no longer an excuse. In person meetings are necessary and essential to keeping the board accountable. I strongly opposed any further Covid measures, funding or "virtual" anything

I oppose our local government continuing to expand coercing families to inject their children with experimental covid 19 vaccines. Detailed informed consent must be provided to parents by doctors on possible risks and benefits and the parents should decide without being bribed or coerced. Our government should get out of the covid business completely, cease the "so called" emergency and receive no further funding. I also oppose meetings the public is not welcomed to attend and participate in.

The CDC has removed all restrictions. Shouldn't the county follow suit? There is no need and never was a need for these programs. Time to end the free money train and start working for the people. I oppose further Covid programs, it's over stop the abuse.

This proposal is an absurd waste of money. Childhood vaccinations are the domain of the parents. Covid19 shots are available for free at many locations. Parents who want to take advantage of that have already done so. 'Establishing, expanding and sustaining' a public workforce to inject children in schools is crazy talk. This happens in a Doctors office or clinic with the parent present. Government employees injecting kids at school? You're really going of the rails with this one.

Please do not waste taxpayer money on vaccines that are losing their potency and are not wanted by parents who have overwhelmingly rejected the COVIS 19 "vaccine" for their children in California. Many parents agree and are deeply concerned that there is no long-term data on how multiple shots and boosters for COVID will affect a growing child or the possible long-term damage.

The emergency from early 2020 has long been over. Case numbers are based on tests that can't tell if a person suffers from an infection & are often run at too high amplification cycles to create more false positives. We know of several safe & effective methods other than inoculation to prevent & treat infections. Children are not targets of CV19 infection. But both masks & ill-characterized gene-based injections have been shown to cause disease &

even deaths. Don't waste money and kids' health!

Discontinue the county State of Emergency for Covid 19. Per Civil Code 101080 and Ca Gov Code 8630, the emergency MUST end at the earliest date possible. The county services and hospitals are not overwhelmed and haven't been for a long time.

item 21.3 Covid does not pose a threat to children. There were over 174,000 cases for kids 18 and younger and 2 deaths. There is no need to pay \$1,109,770 for staff to vaccinate children for covid (or other diseases) at county schools.

The covid vaccine was developed two years ago against a strain that is no longer in circulation. The virus has evolved. Why hasn't the San Diego Health and Human Services Agency or the Board of Supervisors?

You all believe in "survival of the fittest," don't you? It's time for you to evolve public policy according to what's obvious, empirical data, and scientifically current ... or become your own dinosaur (extinct from public office).

End all covid nonsense now. Even the CDC has recently recommended:

-- vaxxed and non vaxxed are to be treated the same

-- no isolation for those testing positive

It's done.

The greatest damage from this pandemic has been from the governmental over reach of shutdowns, mandates, and fear mongering. There are children who will be scarred for life due to these over reactions. It needs to end.

Stop wasting our taxpayer money on Covid responses for our children! No vaccine mandates! The parents can have decided and rejected them. Look around--most of SD has moved past Covid and is living their lives. If you force these vaccines, the long term damage will be on your souls and will hit your pocketbooks when the true effects are known. While you are at it, get rid of any and all mask mandates on our children--the harm caused is much worse than any benefits.

STOP the wasting of OUR tax dollars on what is not an emergency! STOP abusing the kids with mask and "vaccine" mandates. This is very unconstitutional. But you will vote it through. The question is.... Will Jim and Joel going along with their agenda?

J Houck

The Covid vaccinations are not working. Leave the children alone. Parents don't want the shot for our kids. Stop going after innocent children. I do not consent to more wasteful spending of tax dollars for Covid. There is no emergency. California Health and Safety Code 101080 requires "termination of the local health emergency at the earliest possible date that conditions warrant the termination." There is NO EMERGENCY. end the emergency orders NOW for Covid & monkeypox!

Linda Rayner

I am a parent in 92163. I do not agree with spending the educational budget on Covid vaccines. This is a waste of our funds. Focus on the education of the students and let PARENTS take care of student health.
Sincerely,
Linda Rayner

The State and County are perpetrators of criminal child abuse. The Bd is made up of New World Order communist grifters. They could care less about comments. This comment will likely send one of the 87000 new IRS agents to my house. Welcome to China USA. Big thank you to all the fighters against tyranny. Communists are running the entire government.

Waste of taxpayer dollars, not to mention early studies show 30% of minors receiving these shots suffer heart damage and who knows the long term health affects down the road. Please reconsider, thank you!

I strongly oppose this agenda. For two primary reasons, budget and ineffective ness of the Covid 19 shot. Children should not continue to be experimented on with an unapproved by the FDA vaccine. They can make that decision when they are an adult. Also this is a misuse of tax payer money.

No no no

Cindy Kaplan

Spending taxpayer money on covid shots for children makes no sense. Children have a miniscule chance of dying from covid yet an increased risk of myocarditis,, pericarditis and neurological issues. The risk of these shots outweighs the benefits. STOP PUSHING THESE SHOTS ON CHILDREN!

1) The COVID vaccines do not prevent transmission or getting sick. They are harmful to kids. Do NOT give these kids the shot. 2) The county reports 174,000 COVID cases in kids and only 2 deaths. COVID does not pose a threat to healthy children. 3) Teleconferencing is useful but not under the guise of a non-existent emergency. You can implement teleconferencing under the original Brown Act ADA provisions. 4) County data shows no local health emergency
