The YMCA of San Diego County supports the County of San Diego's efforts to increasing services in the continuum of care. Leveraging data, leading with equity to learn from the community, and creating new opportunities can ensure gaps in the system are being met. We encourage family-centered approaches, flexibility in contracts, and intentional commitments to prevention services, especially for children, youth, and their families. This can include spaces with nonprofits & the child care sector.

HASD&IC supports the County of San Diego's ongoing efforts to increase services in the continuum of care and use data to better understand gaps in care for patients with behavioral health conditions. We look forward to future conversations with the County to learn about the Optimal Care Pathways model, how it will be implemented, and participate in future planning as the County makes important investments to close gaps in care for San Diegan's suffering from behavioral health conditions.

The contiuim of care must have more express focus on children, 0-5 and thier support systems. Wait times for up to a year is unacceptable for children and families that need behavioral adn meantla health support NOW; investment in expanded services is crucial. Healthy Development Services is reaching families effectively, but MUST be financially supported to expand services. Funding Mental Health Supports though the k-12 system is a start, but ies not reach the under 5 community.

You all have no business running, guiding or overseeing anything to do with healthcare. Your reckless decisions have shown negligence and deaths to the community people!
