Please file with agenda item #19 - re: FRAMEWORK FOR OUR FUTURE: DECLARING HEALTH MISINFORMATION A PUBLIC HEALTH CRISIS

Dear Readers,

If you want to criminalize or 'suppress' (officially discourage - whether by resolution, ordinance, or whatever) 'misinformation,' and just that which is related to health care, you are opening the door to law\$suits for discrimination, due process, and free speech.

But also, consider that a lot of this 'misinformation' is on both sides. Believe it or not, the CDC can be wrong, wrong, wrong. And rogue websites can be right, right, right. And people DO make errors in meaning or definition (like the difference between 'authorized' (under an EULA) and 'approved'.)

So let's not get in a situation where 'the pot calls the kettle black.'

Regards, Paul Henkin

Please file with agenda item #19 - re: FRAMEWORK FOR OUR FUTURE: DECLARING HEALTH MISINFORMATION A PUBLIC HEALTH CRISIS

Dear Readers,

I noticed something in the actual resolution - was it proofed?

In the proposed resolution to the Board, it says "WHEREAS, the COVID 19 vaccine is available to everyone in San Diego County." It is NOT - it should only be available to 12 or 16 year-olds up.

How much effort and cost will result from people blindly taking vaccine they shouldn't?

In the event that the resolution is approved, please correct this statement. Thank you!

Regards, Paul Henkin
