Nathan Fletcher DOES NOT "fully support the first amendment" as he publicly stated in relation to this resolution. We live in a democratic republic governed by Constitution of the United States and this resolution is directly at

odds with the first amendment. Not only do I passionately OPPOSE this resolution, I am terrified that a community leader (Nathan Fletcher) conceptualized it. I believe he should be removed from his role for acting against our country's founding principals.

Governments do not have the right nor the responsibility to determine what speech is allowed to be spoken. True, false, misleading is for the public to determine based upon all other life experiences. Government does not have the expertise to determine what is correct speech so it will just accept the recommendation of some agency to decide what is correct and use that to rule over others. A free country allows all forms of speech. Totalitarian governments shut down dissent.

NO ON 19. Using public health as an excuse government overreach. Anything you disagree with can be labeled misinformation - it's being done now by the tech giants even though there may be science to support many different sides of the covid issues. This is a dangerous measure and should not pass. My father and husband fought for this country, and for our freedom of speech and choice. It sure seems like we are losing those rights little by little, sadly.

Misinformation has divided this entire country, & anything that defined, identify, or restrains its use is a giant step in the correct direction! Please make our county an example to others of the fight against this chronic, horrific scourge!!

I strongly oppose. Not only is it a violation of free speech, but there is significant evidence that the medical advice being rendered in various governmental agencies is more politically driven than medically driven. There is a great deal of scientific evidence that contradicts the so-called official government position, and everyone must be free to choose what they believe is best. Even now, many of the previously prohibited medications are being acknowledged as very effective.

My family and I vehemently oppose this ridiculous overreach. I would like to point out that this meeting is to be so concerned about covid and misinformation yet tonight we have watched HUNDREDS of speakers come across this podium and it is not being cleaned. If we are so worried about people in masks and the possibility of particles getting through a mask why is there no concern for the hundreds of thousands of spit particles all over that surface. Why? Because it's a lie. WE DO NOT CONSENT

Considering there is misinformation being circulated on both sides of the vaccination issue, I cannot see how one can decide which is true or false. There are so many variables on both sides that need careful consideration. Therefore, it is IMPERATIVE ALL INFORMATION is given as has always been done. Each person is responsible to read and discern for themselves how to proceed.

To the Gentleman attempting to control information,  
You have no Constitutional right to do this; if you pass this, you and your cronies on that board can fully expect both personal and city-wide lawsuits if you try to enforce this maniacal proposition.  
We are sick and tired of small-minded bureaucrats constantly overreaching and setting themselves up above the law.  
My advice: Please drop this insane proposal now--you have no right to authorize such a sweeping power to yourself, period!

I oppose this item. We should be celebrating a vaccination rate of 75%, which would not have been possible if there truly was a "crisis of misinformation." Right now there is a lack of trust and the only thing that will overcome it is greater transparency. This resolution is the exact opposite of transparency. The Board of Supervisors is creating a slippery slope if they approve this measure. I urge them to vote no.

And for goodness sake, please, follow the money!!

What doctor stands to gain by telling his patient this COVID shot is not a healthy option?!?

The only thing she or he faces is DISCRIMINATION and the potential loss of their job.

Who stands to gain from you getting this ineffective jab?

Big Pharma and any government official who is lining their pockets from their investments in a pharmaceutical company. Period.

I strongly oppose the restriction of our freedom to choose for ourselves when it comes to our health. Each person is responsible for their own body, health and healthcare decisions. As a frontline healthcare worker I have seen firsthand the morbidity and preventable hospitalization that are the direct result of the anti-vax and anti-mask misinformation. Curbing misinformation is critical to diminish the impact of the virus, increase our healthcare capacity and protect our children. Healthcare workers are leaving the field in part due to exhaustion from fighting misinformation.

My family and I oppose agenda item #19. Nathan Fletcher is trying to censor free speech by using his standards to determine what is correct information and what is misinformation - biology and medicine are not as precise as mathematics and data collected in these fields have relatively high degree of uncertainty. Accuracy of information can't and shouldn't be determined by specific ideology, political beliefs and emotional state of elected individuals. Thank you

I am a family physician and support this. The comments from the gallery are good evidence for why this resolution is needed. The comments regarding this being censorship or a vaccine mandate are not consistent with the wording of it. The number of overtly false statements by the opposition speakers is exactly why this resolution should be passed.

**Lorraine Melendez**

Declaring "health misinformation" as a public crisis is the REAL crisis! People are allowed to have differing views and opinions. Last I checked, we lived in the land of the free, but this agenda item feels very much like a dictatorship. What happened to "My body, my choice?" When the medical science regarding COVID-19 is constantly evolving and changing, with new discoveries monthly, I do not feel he branch or level of government has a right to say what is good information and therefore to define what is misinformation. At one point in this pandemic it was misinformation that you needed a mask, thereafter masks became mandatory. Because the facts have not stood still, we cannot say what is and is not misinformation, and if we did, it's not the job of the government

I strongly oppose Nathen Fletcher and his plan to silence "misinformation". The American people have a right to know the facts and make their own decisions on what goes into their body's. It's very clear this is just another unconstitutional power grab. Covid 19 will continue as long as the liberal party needs mail in votes to win elections. There are EASILY as many or MORE REAL DOCTORS who OPPOSE these experimental drugs, and MILLIONS who REALLY DO CARE about their health (their own health - as well as the health of all others)!! You are ONLY presenting ONE SIDE...and it is only the side that is being used as a tool to control and propagate fear. Why are there no discussions about HEALTH and MAINTAINING ONE'S HEALTH TO BEGIN WITH?? NO CONSENT for Mandates!! Freedom of CHOICE!!!

Nathan Fletcher, we are not fooled by the slick propaganda video you just showed. Why do you keep pushing an experimental mRNA injection that may have life-threatening consequences on us? Why don't you advocate therapeutics like human-consumable ivermectin and hydroxychloroquine? Why do you ignore natural immunity and breakthrough cases among the "vaccinated"? We need an open dialogue to discuss medical options and the freedom to choose what is best for our health with our doctor. To declare any medical advice, which doesn't fit the current COVID-19 narrative, as misinformation, is irresponsible, short sighted and a threat to our democracy and freedom.

There are plenty of studies and examples of treatments such as Ivermectin, hydroxychloroquine, zinc, and azithromycin working safely and effectively around the world. I also know this first hand.

I oppose AB1002. We do NOT consent to this government overreach and censorship. Who decides "misinformation"? The public has already lost faith in Public officials information, censoring what is said will only further dissolve the trust of what is being said. For I g then censorship begs the question, what is being fought to be kept hidden? AB1102 is wrong. It is our inalienable right to chose what we say and what we chose to believe

I resolutely oppose mask and vaccine mandates, and the silencing of those who point out glaring errors in government health authority guidance. Masks do not prevent the spreading of viruses, as can be seen in any analysis of mask mandate timing and Covid outbreaks. Masks are junk placebos that restrict breathing. Further, vaccines should not be forced on any human, especially those who cannot receive vaccines for health reasons. And if one is vaccinated, why do they care if others are?

Why would we trust a corrupt government and officials to decide what is true? They are the last people to be trusted, especially given how unethical and misleading they have been during this time. In addition, if complete immunity from litigation for the pharmaceutical companies that manufacture and promote these products doesn't get your attention, perhaps the fact that it is given out for free should. Your idea of "misinformation" around COVID continues to change as new things are discovered. Remember how saying that COVID may have leaked from the Wuhan lab was "misinformation" qnd was censored online, but then Biden said that may be true. Labeling opposing views, non-traditional treatments or ideas and suppositions as misinformation is censorship. This is a gross over-reach of the County BOS roll and you have NO authority to determine what is true or untrue information regarding COVID.

Allowing local governments to decide what is “misinformation” is 100% censorship based on personal politics. Why does one group of people get to decide which doctors are the “right” ones. The science is NEVER settled. To ban citizens of the United States of America the freedom to share and discuss differences among the scientific community and decide for themselves and their family what to do is not only wrong it’s against everything this country was founded on. Censorship is our greatest risk to public health! Without an open conversation with ALL the information, we cannot make decisions for our health. In a time of deceit, telling the truth is a revolutionary act. "Misinformation" is anything in opposition to one biased narrative, based on lies, corruption, and deceit! They die from the vaccine, not Covid.

The spike protein in the vaccine is causing all these variants, and infecting the unvaxed

I'm no threat to you if I CHOSE to not get vaccinated.

Current shot will not protect you against the prior variant shot.

Masks do not work. There is no scientific data

Covid basically amounts to a cold or flu.

Censoring any communications between the government and the people is a violation of our 1st Amendment rights. If you are worried about misinformation causing a general distrust of the official vaccine narrative, then find a better argument. The TRUTH will win over lies if it is heard, but lies can only grow in the absence of TRUTH. Censorship is a tool of tyranny, and this bill is another step by the SD board of supervisors to a totalitarian medical state (1984 style). I oppose this bill.

Many San Diegans would agree that the proliferation of misinformation related to health is indeed a public health crisis. Not many of them are likely to realize the need to publicly declare their support for this resolution. Most of us understand the science to the best of a lay person's ability, and are patiently complying with government mandates to stop the spread. We continue to be caught off guard, a year and a half later, by the vocal minority who stubbornly refuse to cooperate.

I URGE you to OPPOSE this measure against free speech. This should not even be a consideration. It shows maliciousness and totalitarian greed of those wanting to control a narrative. Open debate and freedom to publicly disagree are manifestations of HONESTY, LIBERTY, and TRUTH SEEKING. Why would anyone want to live in darkness of tyrannical control of speech? That is hellish. This is utter foolishness and evil. Anyone proposing for this measure despises truth, America, and individual liberty.

I OPPOSE item 19 because I SUPPORT open debate. In the words of JFK, "Without debate, without criticism, no Administration and no country can succeed-and no republic can survive. That is why the Athenian law-maker Solon decreed it a crime for any citizen to shrink from controversy." This is a massive violation of our first amendment right to free speech, religious freedom, and the right to govern our own minds and bodies. You do not have the right to decide what it is misinformation for anyone! Ivermectin is a safe, anti-parasitic drug, with anti-viral properties and is showing great promise for Covid treatment in studies. Do the research!! Dear Supervisors,

Our CSUSM course in popular culture, which has a significant focus on social media and the dangers therein, is a revelation for our students, one that would benefit the county's entire population. In lieu of taking the course, this declaration will certainly draw attention to a critical and sometimes deadly problem—and perhaps enlighten some folks.

Misinformation is indeed a public health crisis.

Most sincerely,

To even suggest that, " health misinformation now presents a greater threat to public health than a variant of COVID-19" is beyond irresponsible. It is a - made up statement - made out of "whole cloth" with not a shred of evidence to back it up.

Nathan Fletcher is overreaching. His declaration of health "misinformation" as a public health crisis, "more of a threat than a variant of Covid19" is ludicrous. CA constitution article 1 section 2: Every person may freely speak, write, and publish his or her sentiments on all subjects, being responsible for the abuse of this right. Sharing medical information is a 1st amendment right and giving a government body the right to declare some medical information as misinformation is a slippery slope to censor any information that does not align with the mainstream narrative. The makers of the vaccines have informed us of the risks so that they can't be held liable. It's our right to have info from multiple sources then evaluate them to make the best decisions for ourselves. People are being threatened with their livelihood being taken away, if they don't get a shot. Freedom of Speech is protected. This is still the United States of America and we still have a constitution. We are not in a war. Life is functioning as usual, minus the rights/freedoms local tyrants have taken away. People are surviving this virus at a 99% rate and we will see that grow as proven treatments continue to be successful, despite the narrative against them from big pharma and local government tyrants. Power to the people. We were born here free and will die here free.

Critical thinking is something we want to encourage in our country rather than discourage: receive information, research the facts ,compare sources, come to a conclusion, and live out your convictions. That is freedom. Censoring or removing information that the public receives in order to create a desired outcome is manipulation. It is also in direct opposition to our First Amendment, and our rights as Americans to free speech.

Please hear us. Those standing up for health freedom, freedom of speech and non-discriminatory behaviors are not doing this because it's fun. There is a reason we are all speaking up. We are being lied to, and for those that see it we are speaking up for everyone, we desire freedoms for everyone, even those that slander us. Health misinformation has become dangerous to the public health (i.e. not vaccinating and doing our part to achieve herd immunity against this disease with low, but somewhat unpredictable, and tragic, mortality). Calling attention to the situation via government agency, is the civically responsible thing to do.

Racism impacts African Americans in various ways. One of those ways is trust. I would ask you to consider this when you are creating a plan for this new health crisis. Independent business have struggled enough during the pandemic. Employers should be given a choice as to what they want to do regarding their employees. Due to the fact that there are still mask requirements, people are still being protected from the transmission of COVID. People are dying and our children and schools are suffering over the rampant misinformation out there. A small,

vocal, and empirically wrong minority are driving the conversation and how we respond to COVID 19. It's time for our elected officials to stand up for the truth and for public health. There is no "both sides" here—there is the science and research on one side and fear-mongering pseudoscience on the other side. It is time to shut down the pseudoscience.

I oppose this agenda item because the government should not have the ability to declare what the truth is or not. That is not the government's role in society. More importantly, what consequences are planned for those they deem violators? There is nothing stopping the County from doing public-info campaigns now. So why the drive to declare it another 'emergency' (unless they want to use that declaration to give them more punitive powers?)

Quit over-reaching on our rights, & instead start reaching for Vitamin D (the adaptive immunity super hero!)

This is an attack on free speech and the start of a slow, progressive slide toward socialism. It might SEEM fine at surface level, or in theory, but we know that these seemingly small bureaucratic inquisitions, ultimately don't work as intended, and have grave consequences. Who then, will be the determinant of what classifies as medical misinformation? Up front, this feels like big brother starting to tighten the rules, and at worst we have seen this devolve into dissenters being sent to gulag.

When a group of people control what others know or can say or not say it is not to protect them but rather to control their thoughts, activities, and actions. This proposition has nothing to do with public health. it is an attempt to silence those who don't agree with the government.

Free speech is not curtailed in an "emergency". It does not mean everything EXCEPT what the gov. deems wrongthink. Many experts & peer-reviewed studies disagree with standard Covid measures. Please do NOT pass this bill.

It depends on government, not science, to determine what is "correct" and what is "misinformation." There is currently so much we DON'T know about this virus. Information surrounding Covid-19 changes frequently- who

is keeping up with that? If something is "wrong" one day and correct the next, you can't un-prosecute someone.

Passing this bill will be a political tool, not one to better our community. It also sets a dangerous precedent for future situations.

On p. 3 Mr. Fletcher states, "The prevalence of falsehoods undermining confidence has surged in recent months fueling unfounded notions.... that people should rely on their "natural immunity" instead of getting vaccinated". Mr.

Fletcher, in claiming that relying on natural immunity - which you put in quotes to imply that it's not a real concept - is a "falsehood", you are guilty of misinformation. The research does not back your claim. What should your punishment be? Who will silence YOUR voice?

Free speech is protected. If you need a copy of the Constitution, I'll send you one. This item is a blatant attempt to silence those that have differing views than the Chair. Now, under the rationale of this item, I'm probably not qualified to say any of this because I'm not an attorney, a Rhodes Scholar, or Mr. Fletcher. However, I am able to gather information, speak with my physician, and make an informed medical decision. The line in the sand is here. We see your cards. Vehemently oppose.

Science is about open debate. Labeling minority opinion as mis-information prevents debate and kills off the scientific process. Historically, minority opinions have often been validated as the truth - possibly even more often than majority opinions. Labeling minority opinions as misinformation is not only anti-scientific process, it is fascist and dictatorial, and a violation of first-amendment values.

To whom it may concern: this proposed resolution has no place in our free country and free state. It stands proximal to impeding on freedom of speech, and lacks clarity for how to define health misinformation vs. health information. To name this issue a "crisis" does little to solve a problem and more to further instigate emotional responses of fear, anger, frustration, and ultimately, invokes unrest within our otherwise peaceful and neighborly society.

This is a slippery slope when we start trying to censure people. There's so much information out there on both sides of any issue. Every person has the wherewithal to decipher what's being said, research it's validity and make up their own mind.

We don't need government officials, elected by us, to actively attempt to violate our rights through the guise of protecting us.

Those who are willing to surrender their rights for perceived safety deserve neither.

I oppose this declaration because as the cliché goes, the science is never settled. That's the nature of science. During this pandemic, "medical information" has changed daily. Misinformation is a leading cause of vaccination hesitancy. Some misinformed people are inclined to ingest or topically apply ivermectin (a veterinary de-worming product) than they are inclined to be vaccinated. Masking and distancing have been claimed to be useless when the Navy and the CDC presented the clear benefits of using face coverings and distancing (<https://www.cdc.gov/mmwr/volumes/69/wr/mm6923e4.htm>). "Should commit to combating health misinformation" (last line) This is vague. There is no boundary or accountability to the enforcing of this objective.

I STRONGLY OPPOSE this agenda item : it could very easily/likely become a misuse of power Furthermore the statement "...the Vax... has been proven to be highly effective in preventing serious disease, hospitalization and death from COVID-19" says what vaccines do- potentially protect a person from severity of a disease. Misinformation and avoiding vaccination will prolong the pandemic. Arguments about free speech are irrelevant when it comes to safety procedures. Do people protest wearing seat belts because they make it hard to breathe or they are too inconvenient and restrict their freedom? This is entirely misleading. Health Misinformation is literally a per person opinion. I never thought I'd live in a state, or country for that matter, that judged a person based on their opinion. Where the definition of said word actually says "view or judgement about something, not necessarily based on fact or knowledge." Therefore, declaring it a health crisis is simply coercion. Are we to get a tattoo if we don't believe? Are we to walk into a chamber if we don't agree?

People can read data about the vaccines and COVID and decide what is best for them and their family, this is not the job of the government.

I would like to see the hospital statics added back to the SD daily/weekly reports showing how many people are in the hospital and ICU for COVID vs other. The "standard" hospital capacity pre-covid was generally 85-90% capacity, because they are a business and need to make money.

America is built on free speech. Free speech is not just what you consider appropriate at any given point in time. Elected officials have no right to determine what speech should be shared and what should be suppressed. Misinformation is not a subjective term that is defined by you. Each individual should be able to hear all opinions and make their own decision based on the information they have gathered. You DO NOT get to determine what information they have the right to hear.

I support this, and the actions proposed do not limit the first amendment rights of Americans. In fact, they strengthen them. By letting Americans know what information is supported by peer reviewed scientific data, they can make better informed decisions for themselves. I strongly oppose agenda item 19 by Nathan Fletcher, on the 8/31/21 agenda.

The greatest source of misinformation over the past 1.5 yrs has been Dr. Fauci of the CDC. Why don't you start there?

He told Rand Paul steroids would not help Covid patients. He was wrong. Dr. Pierre Kory's Math+ protocol, created around March 2020 has saved countless lives. Why did Fauci mislead the public and medical community?

That's only the tip of the iceberg. Start there. But, don't mess with our 1st amndmnt

So now the county wants to force us to agree on the same information with our cultural, and religious diversity? This is ABSURD! The United States of America is known for its acceptance of diversity. Why now the harsh the push for conformity, riding on the back of a pandemic? We need to get back to our God given roots!

Please help me understand this. Who decides what is "health misinformation"? Why is there a right of a wrong

way to look at what is best for each individual's health. To each individual, health may look different, we are all unique and gave different genetic make up. Many doctors have differing professional opinions about health so there should not be anything considered "misinformation" if we are allowing people to be their own unique person with different values and ideas.

I'm writing in support of Sup. Fletcher's resolution to declare health misinformation a public health crisis and recommending action against misinformation. Acting upon factual information is key to ending this pandemic. Pretending there are not bad actors promoting fake news in favor of their own agenda & bottom line hurts the public. This is a dangerous step in the direction of dictatorship and the removal of an individual's freedom of speech. Please look at the adverse effects on VAERS. Freedom of speech can be a dangerous thing, but it is also a very important thing as it allows a person to think and decide for themselves. Those who see it as a danger seek control over the people. Those who value it, seek freedom for the people. Attempting to control others speech and information is abusive. Combat it with the truth.

I wholeheartedly support the proposed resolution. Thank you! I'm sick of radical right-wing propagandists ranting & spreading lies, misinformation & anti-science nonsense to endanger our lives. Bullies who cry "Freedom" and "Tyranny" need to grow up. Nobody is taking away their choice or freedom, but actions have consequences. Don't want to get vaccinated? Fine, but don't whine when I exercise MY freedom to exclude you from working in or frequenting my private business. Choice works both ways.

It is not the role of our elected supervisors to determine what is "misinformation". Science itself is the study of phenomena through observation and experimentation. The scientific study (observation and experimentation) of SARS-CoV-2 and related prevention and treatment are ongoing. As data and knowledge evolve, citizens can determine for themselves what to follow. Use of taxpayer dollars for this unfounded and misguided proposal would be a failure of our San Diego government. Oppose this!

I am proud of our Board of Supervisors for telling the truth about the dangers of health misinformation. Medical realities can change, especially in a global pandemic with a mutating virus, but we can at least learn and spread the latest, fullest medical knowledge available. Unproven or incorrect information results in more people becoming sick, more people dying, and our schools, businesses, and civic organizations impeded from functioning most effectively. THANK YOU for your good work.

There are numerous doctors, scientists, healthcare workers, virologists with differing viewpoints than the main narrative. Credible, credentialed scientists are speaking out. Label free speech a public health crisis and the next step will be making it a crime and calling for arrests. This proposal nothing less than Marxist tyranny. The 'pandemic' not like shouting fire in a theater where one can immediately see the hazard. The virus, covid, the vaccines, masks and people and the information networks comprise a much more complex system where matters are not so obvious. More information is needed not less. This measure is just another means to censor, stifle voices.

I strongly oppose this measure. While it is easy to agree that misinformation is a public health crisis, the actual use of this measure will be heavily biased. Vaccine efficacy data is observably biased and almost entirely provided by Pfizer (who has vested interest in promoting the vaccine). Additionally, this data in of itself supports misinformation regarding the vaccine efficacy. Pfizer and the media tout a 95% risk reduction when in actuality the absolute risk reduction is closer to 1%.

I oppose the matter. SD County Board of Supervisors has no authority or jurisdiction for this proposal. Furthermore, there ceases to be a public health emergency in the County or in the State of California. The proposal constitutes government overreach and fraud in its attempt to circumvent the Constitution. Board of Supervisors is vexatious to free citizens in the county who have a right under the Constitution to exercise free speech without threat of punishment or retaliation.

Censorship is dictatorship. When well respected doctors and health professionals have an opinion based on science and data, and that can't be shared with the people via social media or the main stream media without repercussions there is a problem. There needs to be at a minimum an equal amount of open discussion between all parties so people can make informed decisions in the end regarding what is right about their own health. in the end who defines what is health misinformation?

Disease state management is very fluid for COVID-19; it is unfair to arbitrarily identify any information as misinformation. There was a time indicating the J&J vaccine was unsafe or boosters were necessary would have been identified as misinformation - yet here we are. I could not agree more strongly with the strategy recommendations. I particularly applaud the language in the RESOLVED. While it addresses the immediate issues surrounding the COVID-19 pandemic, it is broad enough to cover the plethora of misleading "health" and "medical" information that has proven so costly to our families, neighborhoods, and communities in terms of alcohol, tobacco and marijuana addiction. Public policy must always be grounded in evidence-based health information and science.

Restricting citizens constitutional right of free speech is not something the county board of supervisors should ever consider doing.

The only way for truth to reveal itself is for open public debate. This has been the tradition of our country since its founding.

In the unknown world of Covid science is basically changing daily, new studies reveal new opportunities and challenges.

Censorship, especially by a committee of the county board of supervisors, is never a good idea, please Oppose

Thank you for addressing this issue in such a specific way. It seems like the loudest voices get all of the attention, but many of us support all efforts to combat medical misinformation that is presented as fact. Free speech is not the issue here - the issue is calling out and correcting opinion presented as fact that is affecting public health in our county.

I oppose. What are the ramifications if someone violated the official government interpretation of Covid? Circling the wagons to control Covid information reaps nothing but distrust. Your Equity Impact rational is wrong. An 80% white Board dictating to people of color that they cannot publicly discuss any differing aspect of Covid-19 is racist on its own merits. The Board's Covid information should stand on it's own merits, not information based by restricting thoughts.

I 100% support the resolution declaring misinformation a public health crisis. Parents refusing to vaccinate themselves or their children and/or refusing to wear masks puts everyone, especially those under 12, in danger. Misinformation is causing many to try treatments such as veterinary anti-parasitics as a cure for Covid 19 instead of being vaccinated, causing our hospitals to again be stretched to the limits with Covid patients, taking up room in ICUs that are needed for non-Covid patients.

This is a direct attack of our constitutional right of freedom of speech. You are the last people who have the credibility to determine what is truth and what isn't. We understand that opposing views scare you because it threatens your hold on public opinion and the lies you are putting out. This is a threat to our constitutional rights and this measure is tyrannical and should not see the light of day!

This is a very slippery slope of censorship. I understand people may say the wrong things, but our elected officials say the wrong things all the time, yet we, the tax paying citizens, are being penalized for our speech? This is incredibly alarming and not the free San Diego we all know and love. Fletcher- it may be time for your resignation as you no longer stand for the best interest of your constituents (AKA your employers)

I strongly support the Chair's resolution -Declaring Health Misinformation a Public Health Crisis. I urge my Supervisor Terra Lawson Remer, and all members, to support this measure. Misinformation is contributing to an increasing rate of Covid illness, hospitalizations and death in San Diego County. Every effort must be made to counter the insidious and dangerous attempt to compromise public health coming from sources of deliberate misinformation.

I strongly oppose agenda item 19. In the absence of long-term data, which does not yet exist, the people need to be able to ask thoughtful questions and speak without being silenced. Silencing people does not make them more open to anything, it instead causes more alarm and I hope that is not the intention here. This proposal is a violation of freedom of speech, and not how resources should be spent.

Freedom of speech is paramount in a free democratic society.

The fact that Nathan is proposing this is frightening and a disgust. Clear power grab of which violates both our

I strongly oppose any resolution that limits freedom of speech. As Benjamin Franklin so eloquently said "Freedom of Speech is a principal pillar of a free government; when this support is taken away, the constitution of a free society is dissolved and tyranny is erected on it's ruins." Mr. Fletcher may have one opinion of what medical misinformation is, and I may have another. The beauty of a free society is that we can both share our opinions and others can make their own decisions.

This is taking away freedom of speech and freedom to do our own research. When doctors or others find a protocol that may work on their patients, it would be labeled as "miss information" if it didn't line up perfectly with the govt's agenda/guidelines. This is not right. There are educated, knowledgeable, and experienced individuals just trying to help others with the knowledge they have gained from their own experience and it is very wrong for them to be blocked from trying to help.

With the health issues (heart, blood, and sensory) that have been well documented related to the vaccine, it needs to be a very personal decision. A certain segment of the population has become so wedded to their political ideology they are taking medicine intended to treat parasites in farm animals as a cure for an airborne, viral infection! We've given the anti-science movement too much leeway for far too long. Their messaging has moved beyond the fringes and is threatening to take root into actual policy. We cannot let this happen. We've seen how politics affect what is considered "misinformation". Facts get deemed misinformation by people pushing an agenda. The county itself was responsible for misinformation this past year and did not hold themselves accountable. This is blatant abuse of power. It is unconstitutional and it's shocking that this is even up for discussion. The government does not get to decide which facts we hear and which we don't. I could not OPPOSE this more! Your job as a leader is to protect the rights of all Americans - those you may disagree with and those you agree with. All information must be open and shared for the truth to come out. By doing this you are "burning books" and where has that led to in history? Please oppose this agenda and stand up for truth and free speech!

Not only is this an infringement on our rights, it is an egregious measure to ensure Fletcher doesn't have to listen to his constituents. I strongly oppose Nathan Fletcher's Framework that declares Heath misinformation a public health crisis. This is an obvious and blatant attack on our First amendment rights of Free Speech. Additionally, Nathan is failing to observe the fact that the CDC has submitted continued retractions, updates, and new findings that change their information they've been providing to the public. To allow our government the ability to decide what is misinformation is a complete overreach and NOT OK. STOP IT.

People need freedom to research and get themselves informed. That is already challenging enough in an environment where the County, State, and Federal governments are actively shaping what information consumers can get a hold of. Pharma has received a huge pass on liability to conduct the greatest experiments in recent history with regards to the MRNA treatments. Look at the wealth its created, and pray that the side effects are not as bad as many doctors theorize.

To believe one can make it law that freedom of speech would only apply if said speech goes along with whatever narrative Government wants people to hear/believe, is beyond overreach and goes against everything America has fought for. Freedom of speech includes open dialogue where we may hear everyone's point of view and make decisions based on all the information available. Vote NO

This agenda item is an affront to our 1st amendment rights. In a time of constantly evolving information and conflicting data surrounding covid 19, this item will restrict discourse and scientific study to a politically controlled rhetoric. The overreach of this item is both astounding and horrifying. Data changes, treatment changes, blocking the flow of new and differing medical opinions is obscene. I oppose Nathan Fletcher's cynical attempt at censorship. When doctors, nurses & other healthcare professionals & scientists contest the Covid narrative, is he so clueless & vain to think HE knows better & can decide what's misinformation & what is simply another viewpoint? Or perhaps he relies on the "experts" who promote the one-sided narrative we've all been subjected to? Shame on you, Nathan Fletcher. As a researcher working on this issue, it is important to recognize the protection of legitimate free speech and discourse on the COVID-19 pandemic. Isn't it ironic that Nathan Fletcher's own resolution contains misinformation? For example he states the following: "At a pivotal time in our history, with an FDA-approved vaccine available to all San Diegans free of charge, health misinformation now presents a greater threat to public health than a variant of COVID-19." This is misinformation! What was actually given full approval was a separate Pfizer-BioNtech vaccine product which goes by the name Comirnaty and is not available in US.

The govt wants a monopoly on what information people can receive and discuss, and that is very directly wrong.. we have every right to question your information any way we want to... that's kind of the foundation and purpose of free speech is it not? Freedom of speech is recognized as a human right under article 19 of the Universal Declaration of Human Rights. When people say follow the science, they only want to you listen to their science (doctors and pharma are swayed by \$\$\$) the real definition of science is: the systematic study of the structure and behaviour of the physical and natural world through observation and experiment, so when you have frontline doctors being censored because they did not observe what other are paid to observe, it doesn't mean it's misinformation. Declaring healthy people espousing their views to be a public health crisis is absurd. If the board truly cared about their constituents' health, they would halt draconian lockdowns, stop forcing children to be subjected to ineffective medical device treatment, and talk about the problems of obesity, metabolic disease and lifestyle choices which are real health issues that can be influenced by physical activity and correcting eating patterns. Not all people who choose not to get vaccinated make that decision based on misinformation. There is plenty of information on the SD County website to be informed. To imply citizens that have made decisions not to obtain the vac. as being solely based on misinformation is disrespectful. People can research and make informed decisions. When the government or anyone tries to control free speech, we go against the very fabric of what America was founded upon. The concept of this agenda is absurd. In todays lexicon, misinformation has an extremely loose definition. By contemporary standards any opinion that varies from that of the individual or group in charge is considered misinformation. You as a governing body are responsible to ascertain public will and act accordingly as the peoples representatives. It is not your charge to define terms or censor opinion. Science is an ever--evolving process, based on hypothesis, gathering data and re-evaluation.

The safety of tobacco, DDT and DES are 3 examples of how yesterday's best information, respected by medical authorities have become today's disastrous misinformation.

As a lover of history, I believe that if you do not consider history and it's impacts you are doomed to repeat its atrocities. This proposal has nothing to do with the health of San Diegans. It has everything to do with silencing our 1st amendment rights of freedom of speech. If you vote yes on this you are stating to us as citizens you are an enemy of our constitution. Scientists who do research and make policy recommendations are being put in the position of providing misinformation since they are often wrong. Hypotheses need to be tested and this policy assumes, without understanding how science works, that our knowledge, data and information are fixed. This is especially true with respect to the novel coronavirus. Even with the same data, we can go in different directions. Witness the different policies in the UK and the US, despite having similar data.

I strongly oppose agenda item #19. The BOS has no expertise, right or authority to determine what medical "misinformation" is. This would silence free speech and opinions that are not in "lock step" alignment with the BOS's opinions. The passing of agenda item #19 would create discrimination and medical tyranny. A complete over reach and unconstitutional.

I STRONGLY oppose agenda number 19. The Board of Supervisors does not get to decide what is considered "misinformation" for the people. It is our constitutional right under the 1st amendment to free speech. The Board of Supervisors and Nathan Fletcher do not get to modify our constitution. I strongly oppose this. Alternative points of view is not "misinformation". There are scientists and physicians who hold different views and are solidly based on science. Clearly, this is not misinformation but an alternative and legitimate view. Creating a bill that would limit the constructive dialogues amongst scientists is harmful and has no place in a free society.

Who is deciding what us or is not misinformation? Fletcher? Because he has been wrong on just about everything during the pandemic. People who said it came from the Wuhan Lab were canceled on social media and had their personal lives destroyed by he and his minions. Now they were forced to admit that it was the case. But the damage was done. Freedom of Speech is literally the most important of our freedoms. When politicians start deciding what is or is not acceptable we enter dangerous waters.

Labeling something as misinformation is so generic and vague and if we give the government the power to change their definition of 'misinformation' at any time, that's a little scary... just like in Israel, "fully vaccinated" will now defined as having THREE vaccines, not TWO, as of Sep 1. OPPOSE. Categorizing what is misinformation has clearly become political. There are countless recent examples of "misinformation" suddenly becoming part of the official narrative with "expert" talking heads on TV saying "the science has changed". The only way to solve the difficult issues we face is to allow for a healthy, open debate. The idea that your constituents aren't sophisticated enough to think critically about information being presented is insulting and elitist.

Misinformation is being spewed from the county. The so-called FDA approval for the Pfizer shot is for a vaccine that is in development that should have cGMP standards, standardized and consistent doses, declaration of vaccine ingredients — none of which exist now. Verified therapeutics? There is zero long-term data on the shot, yet you declare it as gospel.

According to the disclaimer on this page, the San Diego County Board of Supervisors "value our opinions." However, the response to different opinions has been disrespectful and insulting. To say that those who dare to question you are spreading misinformation and are a public health threat proves that you are unwilling to listen. That is called censorship and it is unconstitutional. YES! FINALLY a board who is standing up and saying ENOUGH of the nonsense of misinformation! Now we need others to follow suit.

I am in support of this declaration to help mitigate the spread of misinformation. It's dangerous for the health and safety of our community to allow this to continue without doing everything possible to combat this problem. As a resident of D5, I've been very disappointed at the continued disinformation coming from my Supervisor via his social media and newsletters. Research is NOT A GOOGLE search looking for confirmation bias. Stop spreading misinformation!

I completely support this. Unfortunately, due to an abundance of misinformation out there, there are thousands that are led to believe things that can harm them or do not trust real science that can help save lives. What's worse is that many adults are putting children in their care at risk.

This is a great idea - let's ensure that people are exposed to accurate information as opposed to misinformation!

After reading the proposal I am in complete agreement and urge the Board to approve this proposal. Also, a strong recommendation for indoor masking is insufficient. Given the rise in COVID infections, please re-institute a County wide indoor mask requirement.

It is appalling that a government body will endeavor to control the narrative of health advisories in view of the FACT that there are differing opinions among esteemed scientists, immunologists and doctors about the efficacy, necessity and adverse reactions to the COVID vaccine.

Censorship continues to rear its ugly head! Why does the BOS get to decide what is considered "health misinformation"? A difference of opinion is NOT misinformation and cannot be censored. Nathan Fletcher, are you implying that people are incapable of looking at different viewpoints/perspectives to come to their own conclusions?

The REAL PUBLIC HEALTH CRISIS is masking our children, closing businesses, and the failure of the BOS to REOPEN SAN DIEGO!
