I think next time people are allowed to speak in person or via phone regarding any matter up for vote, they stick to the subject at hand. The decision to declare misinformation related to COVID a public emergency is not a discussion about whether or not to get the vaccine, wear a mask or take away 1st amendment rights. It was not necessary for anti-maskers/vaxxers to attend. People providing examples of misinformation like becoming a chicken and being injected with biobots is within the subject!

Yes, there is an obligation and a great need for local officials to protect public health by taking such actions as declaring health misinformation a public health crisis. Thank you for voting to approve this declaration.

I resolutely oppose mask and vaccine mandates, and the silencing of those who point out glaring errors in government health authority guidance. Masks do not prevent the spreading of viruses, as can be seen in any analysis of mask mandate timing and Covid outbreaks. Masks are junk placebos that restrict breathing. Further, vaccines should not be forced on any human, especially those who cannot receive vaccines for health reasons. And if one is vaccinated, why do they care if others are?

I support mask and vaccine mandates. I am a doctor and see many horrible things happening to people who don't understand the importance of these measures. Furthermore, other people do not have the right to put me and my children at risk by not wearing masks. It is not personal choice when you are a danger to others.

I have been in health and fitness for over 20 years and it is fact that proper exercise and diet are key to a healthy lifestyle. Covid is never going away, you cannot get rid of an airborne virus. People have the right to choose whether they feel a mask and/or vaccine is the way they want to go or whether they want to trust their own immune system. You do not have the right to choose that for us and the people of San Diego will not comply any longer.

Board of Supervisors: thank you for reading our comments. I want to strongly oppose mandating medical intervention or mask wearing for any person, institution, or business in San Diego County. This is a gross overreach of our freedoms as guaranteed in our constitution and is a step away from the liberty America has always been known for. Regardless of one's personal opinions on these issues, we can hopefully agree liberty is more important than mandates that may or may not be useful. Thank you.

Nathan Fletcher you are a politician not a God. You do not have the right to mandate what we put into our bodies. We all know that masks do not work, and in fact cause respiratory infection as well as additional problems for people like myself with asthma. I have had COVID and survived as have others I know. Want a vaccine, get it however COVID is still 99% SURVIVABLE. You will go down in the wrong side of history. Democrats I know now stand against you.

The World Economic Forum (WEF) is an organization outside the jurisdiction of the US and is an unelected body unaccountable to citizen or government oversight (<https://www.weforum.org/about/world-economic-forum>). Nathan Fletcher is a member of the WEF (<https://www.weforum.org/people/nathan-fletcher>). The WEF is advocating for a "Great Reset" (<https://www.weforum.org/agenda/2020/06/now-is-the-time-for-a-great-reset/>) with goals contrary to democracy at the US Constitution. Please investigate.

I strongly oppose all mandates! People need to choose for themselves if wearing a mask or getting a vaccine is what's best for them and their family. I am doing my best to protect the developing mind and mental health of my young children, they deserve to see faces & smiles in all settings, of their peers and adults! I oppose 19! Who is really spreading it anyway? You are and the media! Remember when Wilma corrected the deaths "from" covid to 6 after everyone was being lied to? Stop feeding fear!

I oppose all mandates for masks and vaccines it is not the government's job to tell citizens how to protect themselves. I have medical issues that cause me to not be vaccinated and because of Government overreach, my doctor refused to write me a medical exemption stating that even though I would be a proper candidate for one, he will lose his license. Glve the patient-doctor relationship back to the people to determine what is right for them. This is not the place of the government!

I strongly oppose item #19. This is censorship and government overreach. Science and research changes constantly. Doctors views are different and that's what allows us to make decisions OURSELVES. Focus this energy on directing people to the CDC, FDA, and San Diego website where COVID info is readily available. Why is it that only 1 supervisor (Nora Vargas) has info on their website to direct people to get vaccinated and tested? San Diego...we are better than this.

I oppose any mandate for any medical procedures, vaccines, masks, etc not backed by science. Kids have a survival rate of 99.997% if they get COVID 19 or the Delta variant. If a fully vaccinated person gets COVID or the Delta variant and is a symptomatic, you are not going to know it anyway. There are early intervention therapeutics that prevent hospitalization and death. You guys are going absolutely overboard on this. Why?????!!!!

I strongly oppose agenda item #19; you are not the arbiters of truth and can not stifle our free speech. Members on this board have spread wrong information so how can we know that what you choose to stifle is true or not. Once we start allowing the government to squash speech they do not like, it will never end. Please raise the age of the mask mandate for children. They are not effective for them as they likely can not ear them properly.

I strongly oppose agenda 19. You are "elected officials" and therefore answer to WE THE PEOPLE. You are not the local dictator and you do not speak for me. You have no right to silence anyone's voice, on any matter, for any reason. To say that "misinformation" is a public health crises is nothing short of Nazi style tactics and violates the Constitutional rights of every citizen in San Diego County. Let this be said. It is not your responsibility to completely get rid of Covid or to prevent sickness. It's time to pass the baton of responsibility on to the people. People can and should choose the way they want to protect themselves. Vaccine. Mask. Live in a bubble. Vitamins and sunshine. Street drugs. Whatever! Personal responsibility is the key! Declaring Health Misinformation a Public Health crisis is not feasible. There is no definition of "Misinformation" that could be applied that would not eventually (if not immediately) be used to censor or punish people who have an opposing view to the government or other bureaucrats. There is no room for such a declaration in a free society. People should be allowed to determine for themselves what is "misinformation" or not.

I OPPOSE and DO NOT CONSENT to agenda #19! Here is current research that is NOT misinformation to keep in mind about SARS-CoV-2:

- 1) Our own natural immunity is still stronger than any vaccine over SARS-CoV-2 (Gazit et.al 2021).
- 2). Cannabidiol (CBD) that is found in both cannabis and hemp plants is a blocker against SARS-CoV-2 from replicating itself in our lung epithelial cells (Nyguen et al. 2021– currently going under peer review).

So where is the misinformation in this Nathan Fletcher?

Yesterday @SanDiegoCounty tweeted thanks that our community reached a vaccination milestone. 75% of those 12 and up in SD County are now fully vaccinated. There is no Covid-19 report scheduled for today's SD County Board of Supervisors meeting. It would seem that the information that has been shared within the community has been effective while still allowing for free speech. It also appears to me that there is NO LOCAL HEALTH EMERGENCY. I oppose all forms of medical discrimination in any public place—eg vaccine mandates or passports. This will eliminate people with valid medical reasons why they cannot risk taking the shot. The shots are not 100% safe for all, and discrimination based on medical status is illegal in CA. It's also immoral. Denying public participation to a group of people and using public health as the justification is what led to 11 million deaths in Nazi camps. Learn from history, don't repeat it.

The problem with mandating vaccines is that people like myself with a long history of anaphylaxis/ severe medical reactions to medications are not eligible to take the vaccine. It is complete discrimination because of my medical history to pass mandated bills by my employer, city or state requiring vaccination. I wish to comment on the counties lack of discussion on natural immunity from previous COVID infections. Many scientific studies on the strength/duration of the body's immune response from late 2020 on have occurred and yet the only path forward you push on with is a vaccine. Last week a study was released on medrxiv.org showing natural immunity outperformed the Pfizer vaccine in the largest real life human study to date. So I ask, when will County Health acknowledge these findings as fact?

this is still America, we have freedom of choice. the virus where 99% of the people who get it survive. So why do we need to force a vaccine that has no longer term study, why do we need to provide proof to live our lives? do we need to provide proof that we do not have HIV, the flu or some other virus??? So what happens when the rates of infection goes down to flu levels, do we need to still have proof? this is another dangerous path the government is going to down.

I STRONGLY oppose the gut and amend to AB455 and AB1102. This completely violates the rights of all Californians, will ruin businesses, and drive people out of the state. Why isn't this going through the proper channels and instead being snuck into gut and amends to bills that have NOTHING to do with Covid? This is absurd and whoever agrees with this should be ashamed of themselves!! This is nothing short of needle assault and we should ALL have a choice in deciding what goes into our bodies.

Dr. Kyle Edmonds of UC San Diego asking the Supervisors to continue to stand strong against the small, vocal, unscientific minority in San Diego attempting to undermine all of our public safety. As a County we should continue to come together to protect one another from Covid by requiring masking in public spaces and schools as well as requiring proof of vaccination for all indoor dining, imbibing, entertainment, or exercise. Those of us in the hospital are tired and we need your help.

Please do not pass any vaccine requirements or limit free speech for people who cannot get vaccinated due to certain medical reasons, religious reasons, or due to past vaccine reactions. It is completely against everything we stand for as a community. This community is inclusive and does not discriminate against disabilities, genders, religion, and does not limit free speech. I oppose Nathan Fletcher and request his resignation. Thank you.

What is the purpose of speaking to a board of supervisors who already plans on following an agenda CONTRARY to what their people want?! We are Americans!! We will not give up our FREEDOMS without a fight!

Please keep our community safe by following the recommendations of experts and the lead of LA, the SF Bay Area, and many other communities in re-instituting indoor mask requirements and introducing vaccination requirements for certain indoor activities. These actions are especially important to keep things safe for all the under-12 year olds who are going back to school and are vulnerable, as they are not yet eligible to be vaccinated.

San Diego news channel 8 recently did a story about the nesting grebes at Lake Hodges. Unfortunately the follow up came yesterday as they reported that due to the water level dropping, the nests all dried up 2 weeks from the eggs hatching. I understand the state is in a drought, but the county can control reservoir levels. It would be amazing if the raising/lowering of the reservoir could take this nesting into consideration in the future.
